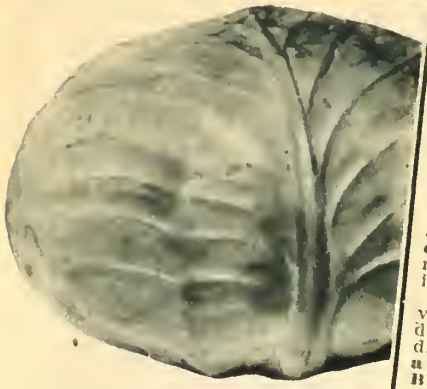
NEW AND MERITORIOUS



Penn State Ballhead Cabbage

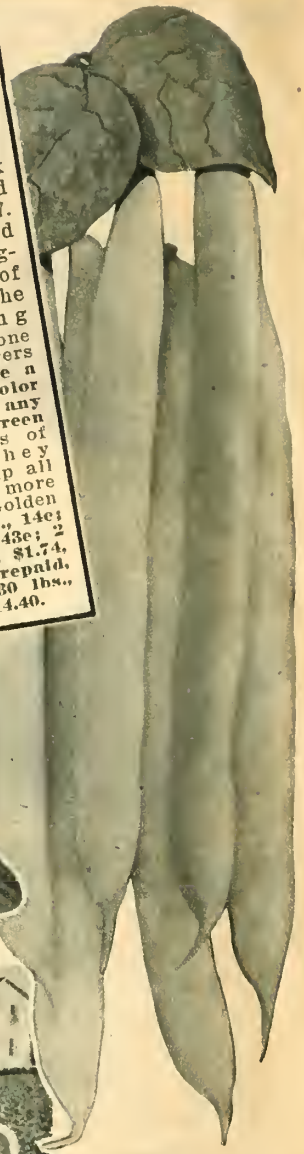
Penn State Ballhead Cabbage

Developed by the Pennsylvania State College of Horticulture, this splendid strain has **yielded heads weighing 25 pounds each, and there are records of yields of as much as 26 tons per acre in this country.** It is an improvement of the old type of Danish Ball Head Cabbage.

The heads are large, round, very compact, and are produced uniformly under many different conditions. **Shows a very marked resistance to Black Leg which has been causing untold losses to cabbage growers.** The heavy solid heads are of the best keeping qualities. **263—Pkg., 15c; ½ oz., 27c; oz., 49c; 2 oz., 86c; ¼ lb., $1.62; ½ lb., $3.12; lb., $6.00, postpaid.**

Salzer's Unrivalled Wax

A grand new wax bean, a sport of the Select Golden Wax which we developed and introduced in 1927. Pods are long and flat, entirely stringless, brittle and of best quality. The plants are strong and vigorous and one of the heaviest bearers known. **Beans are a clear light yellow color and there is not any tendency to stay green** as in some types of wax beans, but they rapidly color up all over. Seems even more rust proof than Golden Wax. **75—Pkg., 14c; ½ lb., 26c; lb., 43c; 2 lbs., 77c; 5 lbs., $1.74, postpaid. Not prepaid, 10 lbs., $2.60; 30 lbs., $7.35; 60 lbs., $14.40.**



Picklers' Special Cucumber

Heinz, the renowned Pickle King, owner of the 57 varieties, developed this new variety for his own canneries' use. This is the strain that produces his canned pickles.

It is the most robust grower and heaviest producer of commercial pickles known. It is the proper shape, nice and small, extra fine quality, takes the salt and shows up well when canned, firm and a fresh green color. Yields in the greatest profusion. **471—Pkg., 11c; oz., 20c; 2 oz., 35c; ¼ lb., 62c; ½ lb., $1.15; lb., $2.25, postpaid.**

Picklers' Special Cucumber

Creamy Heart Lettuce

A new, black-seeded, cabbage head lettuce of the butter type, medium green color and of medium size. The head is firm and solid and the heart is a very rich cream color. **It has a very firm tender, buttery flavor, matures early, is slow to go to seed, and stands the heat of summer well.**

It is much superior in every way to many of the other butter types of lettuce, both in quality, earliness and ability to form sound, solid heads. Is a sure header and yields a fine, heavy crop of best quality lettuce. **579—Pkg., 12c; oz., 27c; 2 oz., 42c; ¼ lb., 75c; ½ lb., $1.43; lb., $2.75, postpaid.**

VEGETABLES FROM 1928

Lake Champlain Muskmelon

SALZER'S LAXTON'S PROGRESS

This fine new variety from England is going to supplant a good many older types. The vines are dwarf, 15 to 18 in. high, and the deep green pods are often 4½ in. long. **By actual count, they contain one more pea to the pod and more pods to the vine than any of** the older Laxtonian type. Our tests show it to be the earliest dwarf, large podded pea. The peas are of a delicious, melting quality, sweet and tender, and pronounced the best quality by all who have tasted them. **859—Pkg., 15c; ½ lb., 26c; lb., 43c; 2 lbs., 77c; 5 lbs., $1.59, postpaid. Not prepaid: 10 lbs., $2.62; 30 lbs., $7.25; 60 lbs., $13.90.**

Laxton's Progress Peas

LAKE CHAMPLAIN MUSKMELON

Lake Champlain has been carefully bred for extreme extraearliness and productiveness. If you want a very heavy yield of delicious, extra-early melons, then plant Lake Champlain. One grower reports almost 2,000 half-bushel basketsful per acre. The melons are medium sized, nicely netted, the flesh is thick and deep, of a beautiful golden yellow color, and is lusciously sweet and sugary. It is one of the best melons ever produced. **624—Pkg., 10c; oz., 15c; 2 oz., 28c; ¼ lb., 49c; ½ lb., 91c; lb., $1.75, postpaid.**

SALZER'S EARLY GIANT PEPPER

A new, very large and very early pepper that will produce heavy crops in the northern parts of the country. The fruits are 5 in. long and 3½ in. through; deep green, turning to brilliant red. Flesh thick and of a very sweet, pleasant flavor. **Salzer's Early Giant is not only very large, but the plants are enormous yielders, as many as 33 peppers having been picked from one single bush.** Best for home gardeners, and truckers will find it profitable.

932—Pkg., 15c; ½ oz., 42c; oz., 74c; 2 oz., $1.36; ¼ lb., $2.64; ½ lb., $5.18; lb., $10.00, postpaid.

SALZER'S OXHEART TOMATO

But here, sir, you will find the last word in tomatoes! **Attractively different shape—looks almost like a Delicious Apple, doesn't it?—large size, unsurpassed table qualities, heavy yielder, healthy vines—it is really something novel and so good, you will like it immensely.**

The skin is smooth, pink in color, and the fruits are almost seedless. The flesh frequently shows an inch thick, without a single seed cavity, and in flavor it is of the first class, luscious and delicious. Owing to its just being developed, it is not yet entirely true to type, but almost all of the seed will bear oxheart-shaped tomatoes, and the balance of the fruits will be very desirable. **1177—Pkg., 15c; ¼ oz., 36c; ½ oz., 65c; oz., $1.20; 2 oz., $2.24; ¼ lb., $4.25, postpaid.**

SALZER'S SEEDS SUCCEED

SOUND SEEDS

SEEDS that have been tested in actual outdoor trials at our Cliffwood Farms! When you Sow Salzer's Seeds, you know that every possible means has been used to give you sound seeds, the best that are obtainable, and that Salzer's Seeds have not only been tested in the laboratory, but that large trials have been made at Cliffwood Farms for germination, hardiness, earliness and trueness to type, under actual growing conditions. Situated as we are, subject to very late spring and very early fall frosts, only the earliest and best seeds will produce their fruits or flowers. When you Sow Salzer's Seeds, you have sixty-one years of integrity back of the purchase,—sixty-one years of seed merchandising and a reputation for fair dealing and for selling only sound seeds to all customers. We welcome the small purchaser as well as the large buyer. If you have never used Salzer's Seeds, let at least a trial order this year convince you of their merit.

SUPER SERVICE

SERVICE that cannot be excelled! Immediately upon receipt, seed orders are put through for quick shipment. Daily air-mail service through La Crosse further expedites smaller shipments, and freight and express shipments have instant attention, so as to reach destination without delay. Plants, shrubs, and bulbs are shipped when weather permits, and this year, we are prepared to send these items either from La Crosse, or from our nurseries in Iowa or Ohio, enabling us to serve you from any one of three points and thereby prevent any possible congestion in our nurseries when the "weather breaks."

SUBSTANTIAL SAVINGS

SAVINGS that quickly amount to dollars! The first consideration in purchasing seeds is quality, and after that comes price. One may very frequently pay a much higher price for greatly inferior seeds, but we know that no one can purchase better seeds for more money. Our prices this year are lower than ever before. Substantial price cuts have been made over last year and former years, due to our constantly increasing volume of business, which will mean material savings for you.

SALZER'S SEEDS STAND SUPREME

Wax Beans

SALZER'S PROLIFIC BLACK WAX

An improved strain of the old favorite German Black Wax Bean, and is a larger and better grower, and a much heavier bearer than the original variety. Pods are 4 to 5 inches in length, quite round, very meaty, brittle, and stringless, and of a fine deep golden-yellow color. Of vigorous growth and bears splendidly for a long period. Matures in 42 days. If you like the old German Black Wax Bean, you will certainly like this new strain even better.

66—Pkg., 5c; ½ lb., 23c; lb., 39c; 2 lbs., 69c; 5 lbs., $1.42, postpaid. Not prepaid, 10 lbs., $2.30; 30 lbs., $6.30; 60 lbs., $12.00.

CLIFFWOOD EARLY WONDER WAX

Without question this is the most wonderful wax bean introduction of recent years, and the best for the market and the home garden. Belongs to the flat podded class and grows a strong plant eighteen inches high and two feet across. Plants are heavily loaded with pods five to seven inches long, flat, plump, meaty, and of a clear, handsome, waxy yellow color. Very tender, brittle, of fine texture and quality, and is the very earliest wax-podded bean. It is a bountiful yielder and bears for a long season; it is practically rust-proof and it thrives and yields heavily in either a rainy season or in dry, hot weather. Appears to be absolutely unaffected by bad weather. Ready to pick in 35 days. If you have not as yet tried our New Early Wonder Wax, by all means give it a trial this season. You will not be sorry.

WARDWELL'S DELICIOUS WAX

It is a most vigorous grower, matures in 48 days, and produces heavy crops of long, showy pods, 5½ to 6 inches in length, and ½ inch broad, of a handsome golden yellow color. Tender, stout, straight and flat, fleshy, brittle and fine grained, fine flavor and almost stringless even when fully developed. Of strong, upright bush growth, 15 inches in height. Is a splendid shipper, and a great all around favorite on account of its large size, handsome appearance and excellent quality. It is an exceptionally brittle bean.

73—Pkg., 10c; ½ lb., 27c; lb., 45c; 2 lbs., 81c; 5 lbs., $1.65, postpaid. Not prepaid, 10 lbs., $2.78; 30 lbs., $7.75; 60 lbs., $14.85.

SELECT GOLDEN WAX

The standard flat wax-podded bean, and although it is not the earliest bush wax bean, **yet it is so sure to produce heavy crops of large and attractive pods, that it is a great favorite all over with market gardeners.** And if good for market gardeners, it is equally good for the home garden. Whether sown early or late, it bears heavily. The pods are of large size, thick-flat, brittle, entirely free from strings at all stages until maturity, and the quality is excellent. Color is a rich golden yellow, bushes grow about 10 inches high. It is rust-proof, and yields well on all soils. Matures in 45 days.

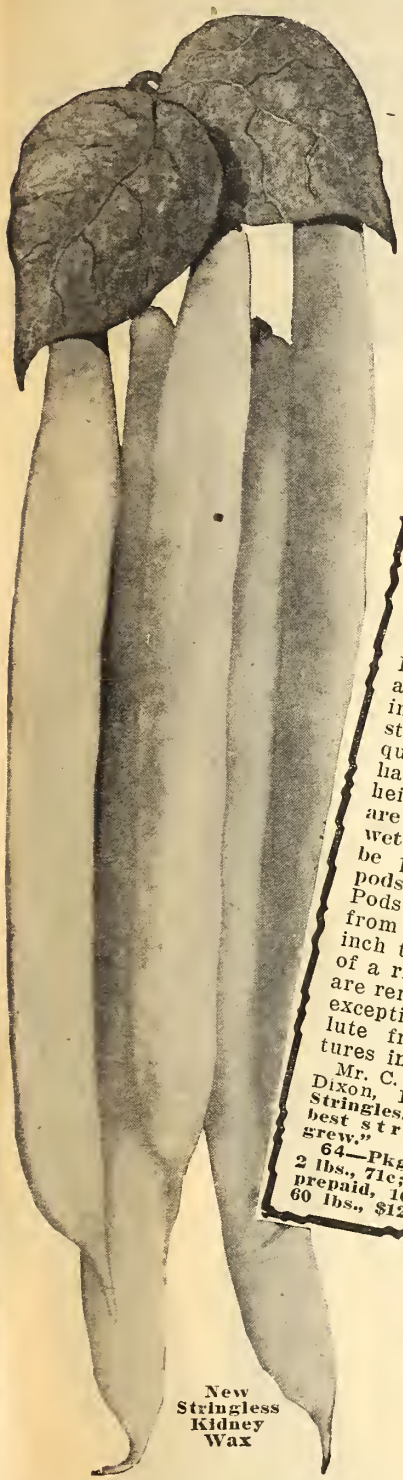
Round Podded Kidney Wax



New Stringless Kidney Wax

NEW STRINGLESS KIDNEY WAX

Enormously Prolific, Stringless, Meaty, Tender and of Delicious Flavor.

This comparatively new variety, originated a few years ago by an Eastern grower, is a most valuable acquisition to the garden. Robust in growth, with long pods, entirely stringless, fleshy, and of superb quality. Plants are of erect bush habit, about 18 to 20 inches in height, and are most prolific. They are free from all diseases; even in wet seasons the foliage seems to be proof against blight, and the pods are always free from rust. Pods are fleshy, flattened in form, from 6 to 7 inches in length, ⅜ inch thick, and ½ inch broad, and of a rich lemon-yellow color. They are remarkable for their brittleness, exceptional flavor, and their absolute freedom from strings. Matures in 45 days.

Mr. C. D. Crabtree, 322 Depot Ave., Dixon, Ill., writes: "Your New Stringless Kidney Wax is by far the best stringless wax bean I ever grew."

Your Kentucky Wonder Wax Beans were the best beans we ever did have.—Mrs. John Knapp, R. D. 1, Box 39, Pedro, Ohio.

Green Pod—SALZER'S BOUNTIFUL STRINGLESS BEANS

The earliest and one of the very largest green podded bush varieties grown. On account of its great earliness, its handsome, large, straight pods and its exceptionally fine quality it is one of the best to grow for the market and also an excellent sort for the home garden. Beans Are Very Short This Year. Order Early.

The plant is of thrifty growth, very hardy, and practically proof against rust or mildew. Pods are stringless, tender, and flat, they are produced very early in the season and the bushes continue to bear for a long time. **It is the first to give pods fit to pick in the spring and the last to yield edible pods in the fall.** Of a handsome, rich green color, they are of large size, thick, broad, flat, extra-long, very uniform in shape, solid, meaty, brittle, and of finest quality. Melting, tender, and having a delicious flavor exclusively their own, the pods are absolutely stringless in all stages of growth. In addition they are most excellent shelled for winter use. Matures in 42 days. Don't fail to plant some beans this year. They may be planted late, taking the place of some early crop like peas. Grow your own beans and can them for winter use.

18—Pkg., 10c; ½ lb., 28c; lb., 47c; 2 lbs., 85c; 5 lbs., $1.74, postpaid. Not prepaid, 10 lbs., $2.95; 30 lbs., $8.20; 60 lbs., $15.85.

SALZER'S COLOSSAL STRINGLESS

An absolutely stringless, green, round-podded bush bean, one of the best for the market or home garden. It is entirely stringless in all stages of growth, from the time the first pods form until fully grown and ready to dry up. SALZER'S RED BEAUTY

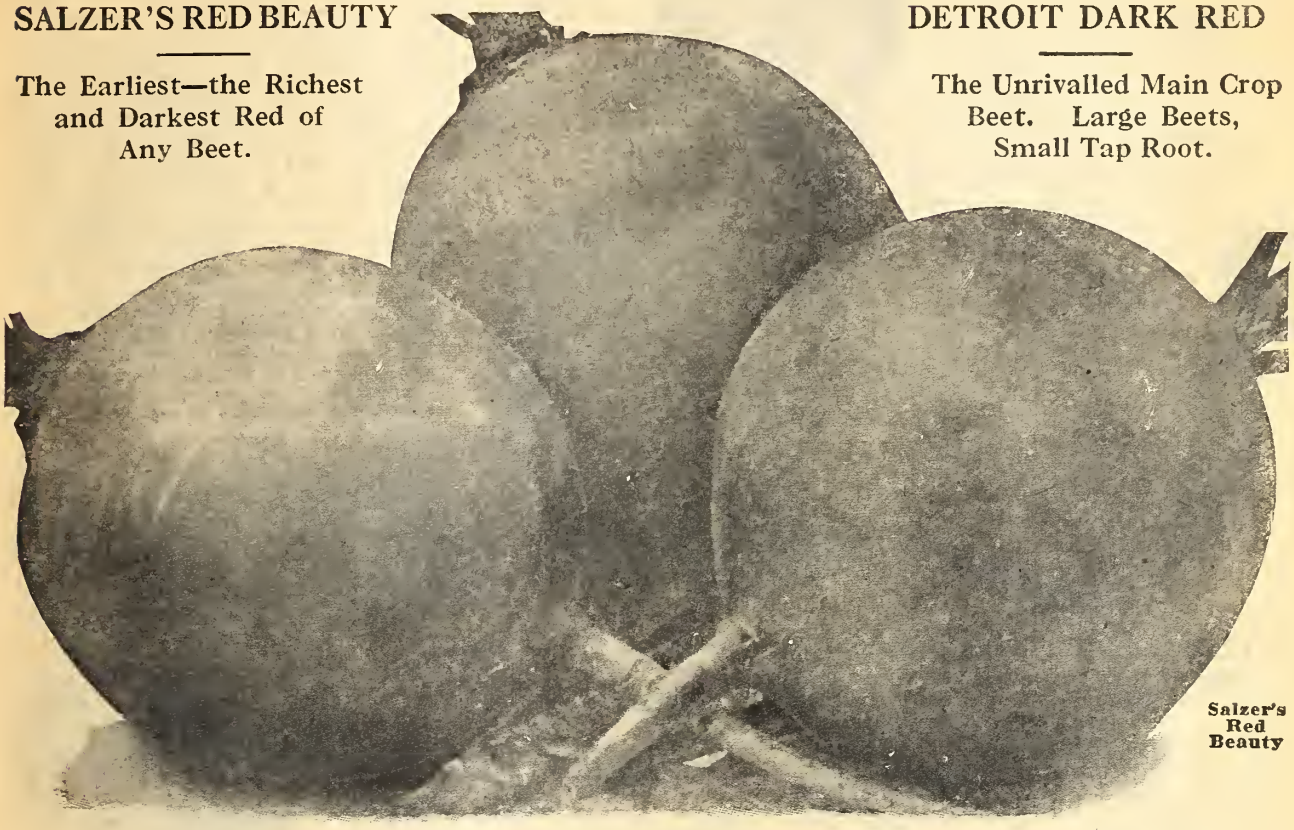
The Earliest—the Richest and Darkest Red of Any Beet.

Cliffwood Tested

DETROIT DARK RED

The Unrivalled Main Crop Beet. Large Beets, Small Tap Root.



Salzer's Red Beauty

Best for Canning

SALZER'S RED BEAUTY

Very early, uniform in size, perfect turnip shape, fine grained, tender, the richest and darkest red of any beet. Salzer's Red Beauty is a mighty good beet to plant and those who have once planted it, see to it that they have some of this fine strain in their garden every year. Its uniformity and its rich, attractive, dark red color sell the beets on sight at market, and for the home garden it not only produces tender, delicious, extremely early beets for table use, but the color is retained when cooked, making them most attractive for both canning and pickling.

Remarkable for its uniform, perfect shape; roots are always smooth, with but a small tap-root, are of medium size, flesh is finely grained, very sweet, always free from woody fibres, and the skin and flesh are **the darkest red of any beet.** The leaves are dark green and shaded with red, are very small and of upright growth, allowing close planting. A heavy cropper, maturing in about 40 days. **166—Pkg., 15c; oz., 19c; ¼ lb., 50c; ½ lb., 94c; lb., $1.75, postpaid.**

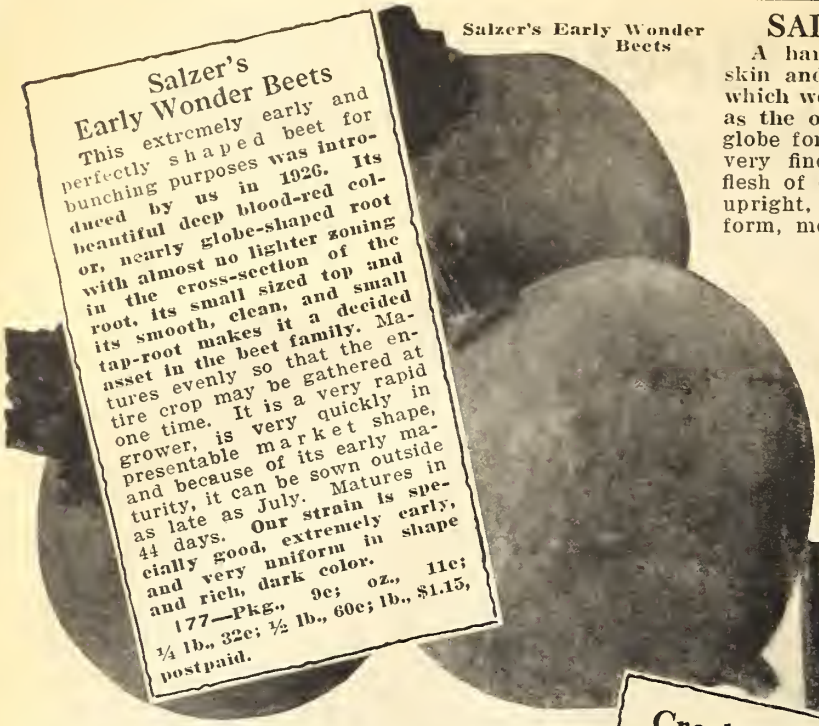
Should Be in Every Garden

The Trucker's Favorite

DETROIT DARK RED

Cannot be surpassed for main crop purposes. One of the largest beets grown and a heavy cropper, producing large, globe shaped roots, delicious, tender, and fine grained, small tap-root, and free from any trace of woodiness or stringy tendency. Succeeds equally well at all seasons and is one of the best to sow in spring to succeed the extra early and medium crop sorts.

The skin is an attractive blood-red and the flesh is dark red, slightly zoned with a lighter shade. It is a popular variety for canning retaining its fine color exceptionally well. Leaves are dark green, shaded with red, tops are small and grow upright. The flesh is solid, always tender and of a decidedly sweet flavor. Matures in about 50 days. Most valuable for succession sowings. A great favorite, not only with market gardeners who grow for profit, but likewise with the home gardener who wants large, good beets for his own table use. A splendid beet to store for winter. **Re-selected seed. 159—Pkg., 10c; oz., 13c; ¼ lb., 35c; ½ lb., 67c; lb., $1.25, postpaid.**



Salzer's Early Wonder Beets

Salzer's Early Wonder Beets

This extremely early and perfectly shaped beet for bunching purposes was introduced by us in 1926. Its beautiful deep blood-red color, nearly globe-shaped root with almost no lighter zoning in the cross-section of the root, its small sized top and its smooth, clean, and small tap-root makes it a decided asset in the beet family. Matures evenly so that the entire crop may be gathered at one time. It is a very rapid grower, is very quickly in presentable market shape, and because of its early maturity, it can be sown outside as late as July. Matures in 44 days. **Our strain is specially good, extremely early, and very uniform in shape and rich, dark color.**

177—Pkg., 9c; oz., 11c; ¼ lb., 32c; ½ lb., 60c; lb., $1.15, postpaid.

SALZER'S FIREBALL BEETS

A handsome, globe-shaped beet with smooth skin and of an attractive deep blood-red color, which we introduced in 1914. It is fully as early as the old flat Egyptian beets, but is of perfect globe form and much superior in quality, having very fine grained, rich and exceedingly tender flesh of excellent quality. The leaves are small, upright, of rich purple color. The roots are uniform, medium sized, of perfect globe shape, remarkably smooth surface, very small tap-root, and the color of the skin and flesh is a brilliant, fiery red. This intensity of color is retained when cooked, making Fireball highly desirable for canning or pickling. Although very early (quickly reaching a diameter of 2 inches), if left growing, the larger roots retain their fine flavor, tenderness and deep coloring. An ideal beet for either the home garden or the market gardener.

167—Pkg., 10c; oz., 12c; ¼ lb., 33c; ½ lb., 63c; lb., $1.20, postpaid.

Crosby's Egyptian

One of the most extensively grown of any variety of beets, by market gardeners, for whom it has been a great extra early money maker! **It is noted for its handsome form, small tops, very small tap-root, fine quality and quick, rapid growth.** Roots run uniform in size and shape, are rather flattened, turnip shaped, reach a good size, are tender and crisp. Flesh is an attractive dark red color with slightly lighter red zonings. Especially desirable for bunching for the early market. Takes on its turnip shape very early, a decided advantage for forcing for real early market. Highly recommended for the home garden for early table use. Matures in 45 days. Salzer's Special strain is sweeter, smoother, more tender and larger, but fully as early, as the standard strain.

158—Pkg., 7c; oz., 10c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00, postpaid.

"CROSBY'S EGYPTIAN"

LUCULLUS Swiss Chard

OTHER SPLENDID BEETS

EDMAND'S EARLY—A good second early variety and fine for winter use. Turnip shaped, skin and flesh dark red, tender, good keeper. 50 to 55 days. **164—Pkg., 5c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.**

SALZER'S CRIMSON GLOBE—Medium size (about 3 inches diameter), globe shaped, and a smooth, even surface. Small tops, flesh deep crimson, ringed and zoned, very tender and fine flavor. Desirable for bunching, and for second early and main crop. **157—Pkg., 7c; oz., 10c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00, postpaid.**

LONG SMOOTH BLOOD RED—The best winter keeper, bar none! Roots about 12 inches by 2 inches, smooth skin, sweet, tender, dark, blackish red flesh. Requires deep, well-dug, and well manured soil. Often sown in July or August, as a second crop Very productive. Best for fall and winter use. **171—Pkg., 5c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.**

Salzer's Crimson Globe

Swiss Chard or Spinach Beet

Also known as Sea Kale. Is grown for its stalks and leaves, as it does not make a bulbous, edible root like the other varieties of beets. The leaves grow large and upright and as the outer leaves are cut, more come from the center. Yields a constant crop from July until winter, and can be used all summer when spinach is not available. The mid-rib or center stem of each leaf is large, broad, and white, and after trimming can be cooked and served like asparagus, or made into very good pickles. The leaf part, far superior to ordinary beet tops, is cooked like spinach. Has a delicious and delicate flavor. Gardeners make good money using Swiss Chard as a catch-crop. It gives quick results. Fine for poultry as green feed or pasture.

LUCULLUS. Stalks very large, broad and thick. Leaves tender, heavily crumpled and of fine flavor. **172—Pkg., 10c; oz., 12c; ¼ lb., 29c; ½ lb., 54c; lb., 98c, postpaid.**

LARGE RIBBED WHITE. Very broad, thick mid-ribs, but the leaves are plain and for this reason preferred by many. Tender, fine quality. **169—Pkg., 5c; oz., 9c; ¼ lb., 26c; ½ lb., 47c; lb., 90c, postpaid.**

Frost Proof Cabbage Plants

Withstand Frosts and Slight Freezes

Frost Proof Cabbage Plants at Cliffwood Farm in Two Inches of Snow

Produces Cabbages Two to Five Weeks Ahead of Home Grown Plants. Can Be Planted Anywhere Just as Soon as Ground is Soft Enough.

If plants cannot be set out the same day received uncrate immediately, dip roots in water and heel out into the ground, spreading bunches a little. Never leave in crate or package.

Set Salzer's hardy cabbage plants out in the open just as soon as you can get them into the ground! No matter if you do expect heavy frosts or some light freezes, if you have planted Salzer's Frost Proof Plants you may rest secure as to the outcome. If the temperature does not go below 20 degrees above zero, we guarantee these plants to live and if any are frozen out we will replace them free of charge or refund your money. Frequently the plants live when the temperature drops nearly to zero.

The market gardener who grows cabbages for shipment or the market, must have extra early maturing crops if he wishes to obtain the highest prices. The home gardener who desires extra earliness and who wants to avoid the trouble of sowing cabbage seed and the necessary protection of early sown seed and plants, will find our frost proof plants to be a great convenience.

Salzer's Frost Proof Cabbage Plants will enable you to have fully matured cabbages three or four weeks earlier than from hot-bed plants. Our growing stations on the Atlantic Coast do not experience the severe weather that prevails in other sections of the country, and here the cabbage seed is sown in the fall and makes a slow, vigorous, hardy growth all winter long in the open ground.

These plants can then be set out anywhere, and although the top of the plant does not grow until Spring weather, the roots take hold immediately and develop even though they should be covered with snow. Later when the weather becomes favorable, they make an astonishing growth, due to their early start. You know what the difference in profits will be, if your crop is harvested three or four weeks earlier than from home grown plants.

SALZER'S LIGHTNING

Grown from the same true to type seed as described on page 16, and bear the same fine extra early cabbages, except that you order the plants instead of the seed. If you want the very earliest conical cabbages, you will make no mistake in ordering Salzer's Lightning Cabbage Plants.

SALZER'S LIGHTNING

One of the most important crops of the Market Gardener is Cabbage. Success in this depends largely upon the quality of seed used. Salzer's Cabbage Seed is the finest grown, having been taken only from carefully selected typical plants, and can be depended upon to grow and produce uniform heads true to name, and in earliness, size, shape, fully equal to the best in the market. First introduced by us in 1889, and pronounced by one and all the greatest addition for the past FIFTY YEARS to the cabbage family. Produces fine sized, marketable heads in 75 DAYS FROM SOWING OF THE SEED. Thousands of gardeners are now depending on our Lightning for their first early crop. It is very hardy, always sure to head and always the **earliest in the market.** The heads are blanched. The plants resist cold and are very hardy, are very compact, have but very few outer leaves, can therefore be planted closely together and yield a large crop per acre.

OUR LIGHTNING is ripe and solid when other sorts are still in leaves. It is simply without an equal in earliness, richness and deliciousness of flavor. No vegetable pays better than early Cabbage. None known to the trade is as early as SALZER'S LIGHTNING. If you are a market gardener, you will want this; if you have a city garden, you cannot get along without it. If you wish the EARLIEST CABBAGE in the world, you must plant SALZER'S LIGHTNING.

218—Pkg., 15c; ½ oz., 25c; oz., 45c; 2 oz., 80c; ¼ lb., $1.35; ½ lb., $2.50; lb., $4.50, postpaid.

EARLY JERSEY WAKEFIELD

A splendid extra-early cabbage that enables gardeners to get high prices by marketing the early crops. The plants are exceedingly hardy. They are compact and erect or very slightly spreading with few outer leaves, which are thick, smooth, nearly oval and a deep green. The stem is short. The heads are of medium size, very solid, uniformly pointed and of excellent quality, with a solid, well blanched heart. Matures about 10 days later than Salzer's Lightning. Is an old standby for early main crop.

214—Pkg., 10c; oz., 27c; 2 oz., 42c; ¼ lb., 75c; ½ lb., $1.43; lb., $2.75, postpaid.

SALZER'S GOLDEN ACRE

Matures hard, round heads, nine inches in diameter in about 80 days from sowing seed. Is rapidly coming to the front as one of the most valuable cabbage introductions of recent years. Remarkably uniform in size and quickness of growth, is very compact, with few outer leaves, permitting close planting, heads are extremely hard, solid and heavy. Heart is nicely blanched and of exceptional quality. Is a splendid shipper. Stem is short, the heads growing close to the ground and ripening very uniformly. It is a great money maker for market gardeners and valuable for the home garden. Crop short this year.

Mr. H. E. Henneman, Market Gardener, Curtin, Ore., writes, "Salzer's Golden Acre is the best cabbage we ever had,—extremely early, sure header and very solid, excellent quality. Some heads weighed ten pounds."

Salzer's New Early Radio Cabbage

SALZER'S NEW EARLY RADIO

A Superb Cabbage Which We Introduced in 1926

Salzer's Radio is a new, very early, Round Head Cabbage, maturing in 75 days just like Salzer's Famous Lightning, which, however, is a conical head cabbage.

We consider Radio a triumph of our Cliffwood Farms. We have been painstakingly developing this wonderful round cabbage, and the heavy sale of this variety last year indicates a great future for it. **The hard, round cabbages are so very solid that they hardly ever burst.** Plants are very compact, short stemmed and have so few outer leaves that they may be set as close as 8 inches apart. Heads are firm, crisp, solid and have a clear, white heart, which is tender and delicious. Although coming to maturity in 75 days' time, Salzer's Radio Cabbage has made a record of 8 pounds per head in weight, at our large Cliffwood Farms. In addition, it is such a splendid keeper that it can be profitably raised for fall and early winter use. For Radio Cabbage plants, see Page 15. Order early.

221—Pkg., 15c; oz., 45c; 2 oz., 80c; ¼ lb., $1.35; ½ lb., $2.50; lb., $4.50, postpaid.

COPENHAGEN MARKET

A splendid variety that is a universal favorite with market gardeners. It is a second early cabbage and bears very heavy heads, permitting a large yield per acre. It is of vigorous growth, but compact, upright and with few outer leaves, heads are nearly round, medium light green, leaves thick and smooth. Stems are short, the heads growing close to the ground and averaging about 10 pounds in weight. Uniform in shape and size and of excellent quality. The entire crop can be harvested at one time. This fine variety comes from Denmark and our seed is pure, Danish grown. Copenhagen Market is a second early of the Danish cabbages. Matures in about 85 days. See page 15 for plants.

244—Pkg., 10c; oz., 35c; 2 oz., 65c; ¼ lb., $1.24; ½ lb., $2.42; lb., $4.75, postpaid.

The heads are of medium size, round, slightly flattened, firm, solid, average 12 to 15 pounds in weight, and do not easily split or burst. Frost improves the delicious and delicate flavor. **284—Pkg., 8c; oz., 25c; 2 oz., 40c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50, postpaid.**

The Grandest, Best Keeping, Surest Heading, Large Cabbage in the World

For almost half a century this grand cabbage has held absolute sway as the undisputed leader of all late flat cabbages. So famous and well-known has it become, that it is not an uncommon occurrence for stores to give the preference to market gardeners who can furnish them with these large, solid, heavy cabbages. It is surprising how many of the retail customers insist upon purchasing only Salzer's Giant Flat Dutch Cabbages for their winter use. They know that its flavor, quality, and tenderness is unequalled by any other variety.

Always In Great Demand

On the city markets, the attractive, fine appearing heads sell themselves to thrifty purchasers. The home gardener who once plants this superb variety, finds it so far **superior in every respect to any other late sort** that he has ever tried, that where Salzer's Giant Flat Dutch has once gotten a foot-hold in a garden, it has never been supplanted by other varieties, but is sown year after year. Unsurpassed in quality and taste, sureness of heading, weight, size, attractiveness, **far superior for sauerkraut** and slaw. Once planted, always planted. Pronounced everywhere to be the greatest late flat cabbage ever introduced, and the finest of any in existence.

A Sure Header

For sureness in heading and regularity in growth, **SALZER'S GIANT FLAT DUTCH** certainly heads the list. Heads are 12 to 14 inches in diameter, averaging 18 to 20 pounds in weight. It forms every time, very large, very hard, solid heads, crisp, tender, sweet, uniform in shape, color and handsome appearance. It has a very short stem, is a very compact grower, forms few loose leaves, which turn in the head and if planted closely will yield enormous crops. Reports of 999 marketable heads from 1,000 plants set out are of frequent occurrence. It keeps well until late in Spring and is good for shipping. There are many magnificent strains of Cabbage Seed offered in this catalogue, but we think we can safely say that **SALZER'S GIANT FLAT DUTCH is equaled and surpassed by none.**

250—Price of Salzer's Giant Flat Dutch Cabbage: Pkg., 15c; ½ oz., 25c; oz., 45c; ¼ lb., $1.35; ½ lb., $2.50; per lb., $4.50, postpaid.

Gives Big Results Everywhere

Mr. F. Bailey, % E. Nichols, R. D. 2, Eaton Rapids, Mich., writes.
"I grew Giant Flat Dutch Cabbages weighing 25 pounds. When we were gathering cabbages, my boy said, 'Here go the Brownies over your cabbage!' and he ran along the tops for 2 or 3 rods, and 12 years old at that. Will grow heavier ones this year."

Marion M. Norris, R. D. 2, Pendleton, Ind., writes,
"Last year we sold $9.00 worth of cabbage, made 10 gallons kraut, and buried 25 heads, from 2 Pkts. of your Giant Flat Dutch. Your seeds surely grow."

Mr. R. E. Pickering, Sholes, Nebr., writes.
"Last year we took prizes at the County Fair on your Giant Flat Dutch Cabbage and Early Rose Potatoes. Am well pleased with your seed."

I planted Salzer's Giant Flat Dutch Cabbage last year, and it was the finest I ever grew.—Wm. Hall, R. D. 2, Bedford, Indiana.

DANISH ROUNDHEAD CABBAGE

The short-stemmed type of the famous and much-prized Danish "Ballhead." Salzer's Danish Roundhead is almost two weeks earlier, has less outer foliage, and is still more blight resistant than its progenitor. The heads are set on shorter stalks than Ballhead, which is preferred by many growers. They are extremely hard and solid, of great weight, sweet flavor, crisp and tender and the heart is beautifully blanched. Our seed is true Danish grown and **produces heads, "hard as a bullet and heavy as lead."** The best late, round cabbage.

246—Pkg., 10c; oz., 33c; 2 oz., 63c; ¼ lb., $1.19; ½ lb., $2.32; lb., $4.50, postpaid.

DANISH BALLHEAD OR HOLLANDER

A magnificent, hardy, late cabbage, making handsome, firm, solid and very hard head. Of great solidity and excellent keeping qualities, and therefore much in demand for winter use. **Grows luxuriantly on almost all soils and under most conditions, withstands hot, dry weather, does not rot easily in wet seasons, and heads never burst.** Crisp, sweet, tender and unsurpassed for boiling, cold slaw, or sauerkraut. Stems are rather long and produce large, round, compact heads, weighing, when trimmed, more than almost any other cabbage. One of the best late cabbages for the home gardener and the trucker.

245—Pkg., 9c; oz., 33c; 2 oz., 63c; ¼ lb., $1.19; ½ lb., $2.32; lb., $4.50, postpaid.

Danish Roundhead Cabbage

WONG BOK (CHINESE) OR CELERY CABBAGE

Has a mild cabbage flavor, very delicate and delicious. Wong Bok makes delicious cold slaw, also a very fine salad served like lettuce. When cooked it makes greens delicately cabbage-flavored and not at all like boiled cabbage. It blanches almost to clear white by tying the plants closely with burlap, when full grown. It requires rather cool weather, and where the summers are warm, sowing must be delayed until early August. Has rather short, broad heads, composed of well-blanched, tightly folded leaves and ribs which are tender, juicy and agreeably pungent. **260—Pkg., 10c; oz., 30c; 2 oz., 49c; ¼ lb., 89c; ½ lb., $1.67; lb., $3.25, postpaid.**

SALZER'S DISEASE-RESISTANT CABBAGE

Salzer's Disease-Resistant Wisconsin Hollander

COPENHAGEN MARKET

A disease-resistant strain of this famous cabbage, which will be welcomed everywhere. For description, see Page 17. We introduced this in 1927 and could not supply the demand. It is going to prove a great boon to all sections where cabbage could not be grown successfully, and will produce heavy crops.

262—Pkg., 18c; ½ oz., 30c; oz., 54c; 2 oz., 98c; ¼ lb., $1.86; ½ lb., $3.60; lb., $6.95, postpaid.

WISCONSIN HOLLANDER

Permits Cabbage Growing on Fields That Formerly Had to Be Abandoned!

Salzer's Disease-Resistant strains beat the "yellows" or "yellow rot." If by any chance your field should be infected with yellows, this is the variety for you to plant. Developed by the University of Wisconsin by selecting and breeding a disease-proof variety of the Danish Ballhead or Hollander type, which see for description. Matures in 120 days.

We furnished the Indiana Experiment Station with some of the seed and they advise that it proved very satisfactory and that they are recommending it to all the farmers. Miss Maude Richardson, R. D. 2, Box 56, Summerfield, Kans., writes, **"We could never raise any cabbage until we got your seed last year. We had the nicest cabbage you ever saw. Anyone with diseased soil ought to know of your disease resistant seed. It surely is fine and worth ten times what you ask for it."** Mr. W. L. Thatcher, Summitville, Ind., writes, **"Took first and second prizes at the Fair with your disease-resistant cabbage."** It will pay you to plant only Salzer's True Disease-Resistant Seed.

259—Pkg., 15c; oz., 37c; 2 oz., 63c; ¼ lb., $1.15; ½ lb., $2.17; lb., $4.25, postpaid.

DISEASE-RESISTANT ALL SEASON

Developed under the same disease-resistant conditions as the Wisconsin Hollander described above.

Has a reputation for heading uniformly. Its exceptional vigorousness will produce a head under the most adverse conditions. **Considered one of the best sorts for kraut.** The heads are very large, nearly round, extremely hard and solid. They are small ribbed and even if planted very late will keep well and are much to be preferred to the big ribbed winter sorts. It is called "All Seasons" because it is as good for winter as for early summer.

258—Pkg., 12c; ½ oz., 18c; oz., 33c; 2 oz., 63c; ¼ lb., $1.19; ½ lb., $2.32; lb., $4.50, postpaid.

I grew several tons of Cabbage from your Disease-Resistant Hollander seed, the finest I ever raised.—Mrs. Annis M. Litton, R. D. 5, Hagerstown, Md.

Salzer's Earliest Coreless Carrot

The Earliest, Sweetest, Most Tender and Only Really Coreless Carrot Grown

Salzer's Earliest Coreless, Finest Carrot in Cultivation

The peer of all carrots—the grandest carrot in cultivation! Market gardeners, if you want highest, top-notch prices, you must plant Salzer's Earliest Coreless Carrot. Home Gardeners, if you want to have carrots that will be a real treat for your own table use, carrots that you will take pride in showing to your neighbor, you must plant Salzer's Earliest Coreless. **A carrot that is in a class all by itself, and has been ever since it was introduced by us over twenty-five years ago.** Some seedsmen may list this or offer you "just as good" stock, but insist upon Salzer's true, genuine, pure-bred seed. Seed that has been carefully tested for germination and trueness to type at Cliffwood Farms.

As in all else, Salzer's Earliest Coreless Carrot reigns supreme in the carrot world. Those who once plant it never discard this incomparable strain. Those who have never planted it, are missing a real treat. **Our Earliest Coreless will demonstrate what splendid flavor, what tenderness, what attractive color, what lusciousness, what symmetry, can be bred into carrots.** The painstaking trial and development of this superb strain is necessarily expensive, but it will pay everyone to allow a few cents more in order to include Salzer's Earliest Coreless in their seed order. When planting seeds, the best is none too good. It is the cheapest in the end as everyone knows, and whenever you go out in the garden to get some carrots for dinner, you will be mighty glad that you planted Salzer's Earliest Coreless this spring.

It is a distinct variety. It is exceptionally uniform in shape, of fine texture **and entirely free of any heart and is very early, maturing about 2 weeks ahead of all other half long sorts,** although fully as productive as any of them, the roots usually measuring 6 to 7 inches in length and 1½ inches through.

Salzer's Earliest Coreless in shape and color is one of the most handsome of Carrots. The roots are of cylindrical form, blunt at the end, very symmetrical, smooth skin, fine neck and small top. The color is **a beautiful red, brighter and deeper than that of any other Carrot.** It is a color that will draw the attention of the buyer on the market.

But the greatest feature of this new variety is the entire absence of the stringy, coarse heart or core found in all other Carrots. It is of most delicious quality and owing to the fine texture of the red flesh and its tender, delicate flavor, Salzer's Earliest Coreless is called the sweetest of all Carrots by all those who have tasted it.

295—Pkg., 12c; oz., 20c; ¼ lb., 60c; ½ lb., $1.10; lb., $1.95, postpaid.

SALZER'S DANVER'S HALF LONG

One of the most popular carrots in America.

Planted on a wide scale by market gardeners, as the roots are of very fine quality, attractive appearance, and always find a ready sale everywhere.

The handsome roots are of orange-scarlet color, measuring about six inches in length by two inches at the shoulder and tapering to a half-point or stump-root at the bottom. Remarkably sweet and tender, fine grained, and free from any woody fibre. **It is a first class carrot for all soils, and yields so heavily that it is also being planted for stock-feeding. Excellent to store for winter and a splendid shipper.** Be sure that you buy only good, fresh seed. Salzer's Seed is all first carefully tested at Cliffwood Farms and every package contains seeds of known value.

293—Pkg., 5c; oz., 9c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00, postpaid.

IMPROVED LONG ORANGE

Very handsome, straight, smooth roots of bright red color, frequently 12 inches long, and 3 inches in diameter at the neck. Does best in light, well prepared soil. A splendid carrot for table use and field culture, combining great productiveness with fine, regular shape, and has tender sweet flesh.

300—Pkg., 7c; oz., 10c; ¼ lb., 31c; ½ lb., 58c; lb., $1.10, postpaid.

SOW SALZER'S SEEDS

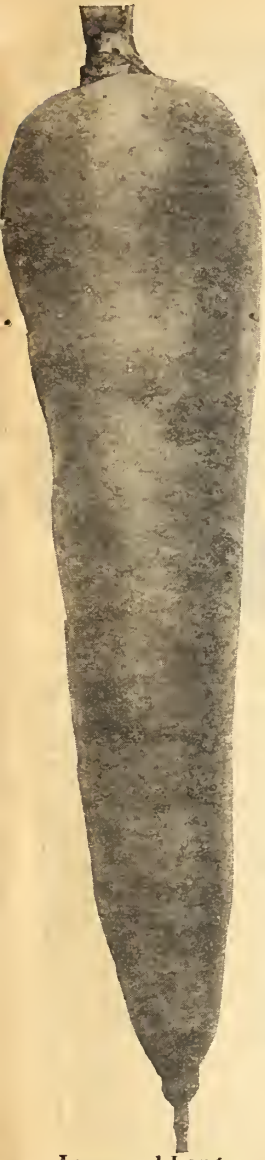
Table Carrots



SALZER'S SELECT OXHEART

Also known as Guerande. The best and most popular of the short, thick-formed carrots. It is a heavy yielder and because of its shape it is highly desirable for heavy soils. The roots are about 5 inches long, 3½ to 4 inches wide at the shoulder and taper down to a 2-inch stump-rooted bottom. Of the finest quality for table use, very free from any hard core, and both skin and flesh are rich orange colored. An excellent sort for the private garden as well as the trucker, being especially valuable for spring and early summer crop. **Of great value on shallow soils, where the longer varieties will not succeed.**

302—Pkg., 5c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.

PRIDE OF DENMARK

A cross between the two well-known varieties, Nantes and Chantenay, this introduction unites the good qualities of both. **Salzer's Pride of Denmark is an admirable carrot for storing and shipping, holding to a remarkable degree its fine flavor, tenderness and crispness.** The long obtuse, cylindrical roots are absolutely smooth, of a beautiful scarlet color and best of all are practically coreless. As the carrots reach a good size (6 to 8 inches), your soil should be thoroughly prepared.

We introduced this in 1926 under the name of Feonia, which name has now been discontinued. Order early as this carrot has already won marks of distinction, and the seed is going to be much in demand this season. In the short time we have been listing it, it has been widely used and all who tried it are well pleased with it. Crop is short this year.

304—Pkg., 15c; oz., 32c; 2 oz., 55c; ¼ lb., 98c; ½ lb., $1.85; lb., $3.50, postpaid.

SALZER'S CHANTENAY

Also called Model. A half-long, stump-rooted sort, and very popular for bunching. It averages 6 to 7 inches in length, is broad at the neck and narrows gradually to a round, blunt base. The flesh is a rich, orange-red, fine grained, tender, juicy, and remarkably free from core. An excellent early crop or main crop carrot and splendid for the home garden.

292—Pkg., 5c; oz., 9c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00, postpaid.

Improved Long Orange (See Page 20)

Field Carrots

SALZER'S MASTODON

Field carrots are of high nutritive value and seem also to be a sort of tonic, keeping the stock in good condition. Horses are especially fond of them and in a good many stables, horses are fed carrots once a day. The wise dairyman knows the value of carrots for cows, as they will not only increase the flow of milk but will also improve the quality, and will give a rich, golden color to the butter. Sow seed thinly in drills 3 feet apart, using four pounds to the acre. To get the heaviest crops, fertilize well.

Salzer's Mastodon Field Carrot is the most productive variety and it is easily harvested. It is of creamy white color with a green crown. The roots are smooth, 8 to 10 inches in length, about 3 inches broad at the shoulder, and taper gradually to the bottom. The flesh is crisp, solid, sweet, white and very nutritious. A splendid keeper, and a prodigious cropper, yielding in suitable ground from 20 to 30 tons per acre.

As to quality, Mr. D. D. Birks, Metaline, Wash., writes, **"We are sending you 3 carrots which were grown from your Mastodon seed. We tried cooking them early in the season and have never quit. I have given them to several friends and all agree with me that they are the best carrots they ever ate."** If Salzer's Mastodon is so palatable for the table, is it any wonder that stock relish it?

1468—Pkg., 10c; oz., 12c; ¼ lb., 24c; ½ lb., 45c; lb., 85c; 2 lbs., $1.59; 5 lbs., $3.70; 10 lbs., $6.85, postpaid.

IMPROVED NORMAN BELGIAN

Roots average 2 inches in diameter at the shoulder, tapering gradually throughout the length of 12 inches or more; flesh is light orange. Fine grained, sweet, tender and very productive. Grows a third or more above the ground, and does best on rich, deep soils. A good keeper and relished by all stock.

1467—Pkg., 5c; oz., 7c; ¼ lb., 18c; ½ lb., 32c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.45, postpaid.

Salzer's Mastodon —The Great Field Carrot— Yields Enormously

Thru variety trials at the Penn. State College, I find that your Matchless Spring Cauliflower is very good.—E. B. Engle, Glen Mills, Pa.

Cauliflower

SALZER'S MATCHLESS SPRING

A fine Cauliflower we introduced in 1927! A grand new strain of the Snowball variety, about 8 days earlier than that famous Cauliflower but with just as large a head. Smooth, solid, snow white curds, very compact and of best quality. We have developed this extra-early strain without sacrificing the size of the head for extra-earliness, something growers have long been wanting. Its quick maturity and large head will please you! Order early.

324—Pkg., 20c; ¼ oz., $1.25; ½ oz., $2.10; oz., $3.75; 2 oz., $6.95, postpaid.

EARLY PARIS

Extremely early, dwarf, having fine white heads, solid and compact curds. Quality is good. This variety is a real bargain and remains very much in demand with many of our customers.

318—Pkg., 8c; ¼ oz., 28c; ½ oz., 46c; oz., 85c; 2 oz., $1.55; ¼ lb., $2.95, postpaid.

SALZER'S EARLY SNOWBALL

Extremely popular in all sections of the country. For planting at all seasons, and as an all purpose cauliflower it is unsurpassed.

Matures in about 97 days, producing uniform heads of large size, handsome form, and exquisite quality, which are good sellers in every market. **Salzer's Early Snowball is the standard variety by which all other sorts are judged.** The heads are smooth, solid, snowy white, with compact curds of excellent flavor and quality.

319—Pkg., 12c; ¼ oz., 50c; ½ oz., 95c; oz., $1.80; 2 oz., $3.55; ¼ lb., $7.00, postpaid.

SALZER'S EARLIEST SUREHEAD

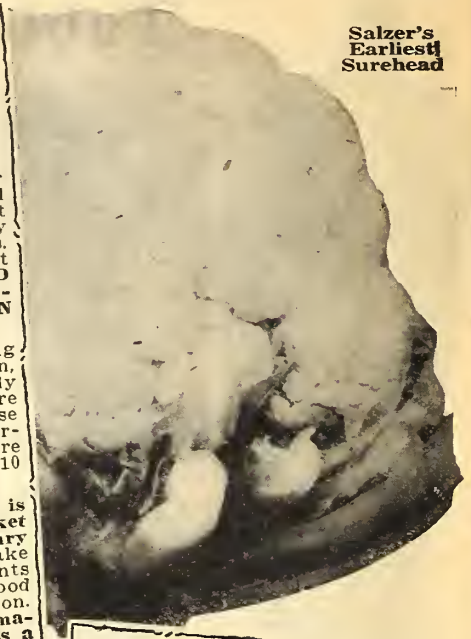
IT HEADS WHERE OTHERS FAIL

Grandest of all! Whether for forcing or open ground, planted early or late, it is the best, surest header of all. It is particularly desirable for forcing under glass. On our trial grounds every plant produced a **SUPERB HEAD AND SURPASSED ALL OTHER VARIETIES OF EQUAL SIZE IN EARLINESS AND QUALITY.**

The plants are of strong growth with erect, dark green, pointed leaves growing closely about the heads, which are pure snowy white, with very close and compact curds of wonderfully fine quality. The heads are of large size, often reaching 10 inches or more in diameter.

This sureness of heading is highly essential to the market gardener and just as necessary for the home gardener. To make the best heads, cauliflower plants need cool, moist weather, good soil and thorough cultivation. **Salzer's Earliest Surehead matures in about 95 days and is a sure header.**

317—Pkg., 18c; ¼ oz., 60c; ½ oz., $1.15; oz., $2.20; 2 oz., $4.35; ¼ lb., $8.50, postpaid.



Salzer's Earliest Surehead

SALZER'S FIRST CROP

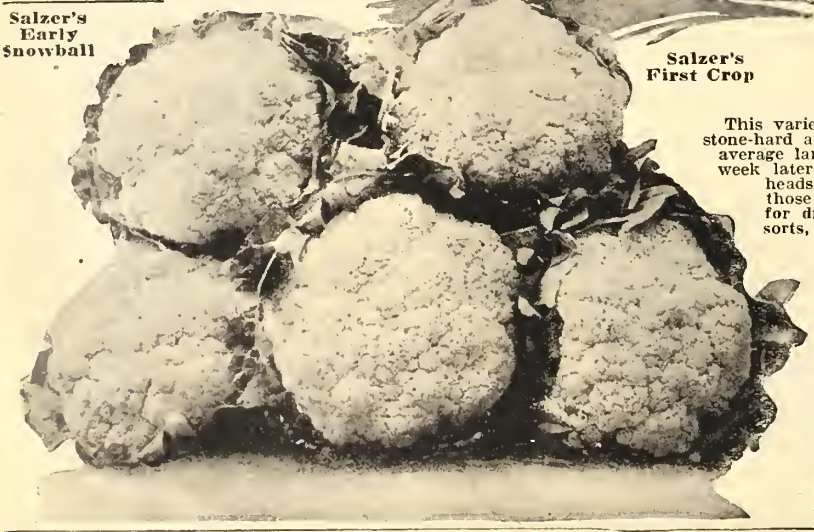
A new, distinct, and extremely early variety. A splendid market gardener's variety, with stone-hard, snow-white heads.

Being of dwarf, compact growth, with but a small number of leaves, it is an **ideal Cauliflower for forcing** during winter and spring. Severe tests have proved it absolutely certain to head when conditions are ordinarily favorable, and also **most uniform in growth, type and maturity,** the crops being taken off almost clean at the first cutting. One characteristic of this novelty is the close sitting together of the leaves, enfolding the head tightly and causing the inner leaves almost to cover the flower, thereby avoiding the necessity of early tying up.

The heads are very beautiful, solid, snow white, of medium size, which will find a ready sale at the highest prices everywhere and will never fail to be appreciated.

321—Pkg., 15c; ¼ oz., 55c; ½ oz., $1.07; oz., $2.05; 2 oz., $4.05; ¼ lb., $8.00, postpaid.

Salzer's First Crop



Salzer's Early Snowball

DRY WEATHER OR DANISH GIANT CAULIFLOWER

This variety is of vigorous and dwarf growth, and produces stone-hard and snow-white heads, unsurpassed in quality, which average larger than those of the Salzer's Surehead, but are a week later. The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. As indicated by the name, **for dry, hot climates it is to be preferred to all other sorts,** being a sure header there when other sorts fail.

316—Pkg., 15c; ¼ oz., 65c; ½ oz., $1.22; oz., $2.32; 2 oz., $4.55; ¼ lb., $8.95, postpaid.

BROCCOLI

WINTER CAULIFLOWER. In growth and habit like cauliflower but far more hardy, and of special value in the North.

EARLY VALENTINE—Grows, tastes, and looks like cauliflower. Easily grown and ideal for short season sections. Large heads, compact curds of best quality. **202—Pkg., 10c; ¼ oz., 18c; ½ oz., 33c; oz., 61c; 2 oz., $1.16; ¼ lb., $2.25.**

Salzer's Golden Self Blanching Celery on Cliffwood Farms

Northern Celery *Grown*

SALZER'S WONDERFUL

Earliest in maturity, superior eating quality, increased size, beautiful golden color, superior keeping qualities, marked resistance to rust and blight,— these are the outstanding characteristics of this superb celery.

We introduced this fine strain in 1924 and were hardly able to supply the demand last year again. It certainly is a grand celery and if you missed out on it last year, be sure to try it this spring.

Salzer's Wonderful produces fine stocky plants with large, broad, thick stalks that blanch easily and quickly to a beautiful clear waxen yellow. They are solid, crisp, brittle, tender, of a much superior flavor and quality, and are entirely free from stringiness of any kind. Trials at Cliffwood Farms prove it to be the very earliest celery, being fit for use the latter part of August, and remaining in use until the later winter sorts mature. This extra-earliness spells top prices from the early fall trade, for the trucker, and the earliest, most delicious, crisp and beautiful celery for the home gardener's own table use. You will be proud of this celery when you serve it at dinner.

Mrs. Elizabeth Schaus, 17 W. Prospect Ave., St. Louis, Mich., writes, **"We planted some of your Wonderful Celery Seed and we want some more. Have raised our own celery for family use for years, but never had as good celery as your Wonderful."**

Note in the illustration how compactly the stalks grow. Salzer's Wonderful grows uniformly like this. The plants are remarkably resistant to blight and rust, a factor of great importance. Earliness, size, attractive color, shape, superior flavor, resistance to blight and rust!—the name WONDERFUL is about the only fitting one for this celery.

345—Pkg., 12c; ¼ oz., 29c; ½ oz., 52c; oz., 98c; 2 oz., $1.92; ¼ lb., $3.75, postpaid.

Salzer's Wonderful Celery—A Real Prize Winner

Please Order By Variety Number

SALZER'S GOLDEN SELF-BLANCHING

The beautiful appearance of the plant, with its close habit, compact growth, and straight, vigorous stalks is indescribable. The ribs are thick, broad, fleshy and the hearts large and solid. As the plants mature, the inner stems and leaves turn to a beautiful golden yellow. Blanches easily, quickly, and perfectly.

Salzer's Golden Self-Blanching is a vigorous dwarf grower and very early. It is easy to cultivate and in every way a desirable variety. It is planted very extensively and owing to its handsome waxen-yellow color, its superb quality, entire freedom from stringiness, crispness and tenderness and its delightful, rich, nutty flavor, this variety is most popular and the leading celery in many markets. The strain we handle is grown in France, it is the finest in the market and produces plants uniform in growth and color, with heavy, solid stalks. We offer only French grown stock.

333—Pkg., 10c; oz., 36c; 2 oz., 67c; ¼ lb., $1.29; ½ lb., $2.56; lb., $4.95, postpaid.

SALZER'S SELECT WHITE PLUME

A fine, popular celery, very early. Blanches to a pure snowy white. Stalks broad, thick, tender, crisp, fine rich nutty flavor and excellent quality. **335—Pkg., 10c; oz., 25c; 2 oz., 45c; ¼ lb., 80c; ½ lb., $1.55; lb., $3.00, postpaid.**

GIANT PASCAL WINTER

Stalks are very large, thick, solid, unusually tender and crisp, snapping like glass. This is the finest of all winter celeries for the home garden but it is too brittle to stand much shipping. It blanches readily to a rich golden yellow. Is a splendid keeper. **342—Pkg., 10c; oz., 25c; 2 oz., 40c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50, postpaid.**

SALZER'S WINTER QUEEN

The standard variety for winter keeping. It is the finest dwarf winter celery that we have ever grown on Cliffwood Farms. The plants are large, of close habit and compact growth, stalks are very large, broad, solid, crisp, tender and of a delicious flavor. Blanches easily to a beautiful creamy white. The stalks are all of even length and present a handsome appearance when bunched. It is a splendid keeper and stands shipping well. **343—Pkg., 10c; oz., 25c; 2 oz., 40c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50, postpaid.**

We tried your Wonderful Celery last year, and it is the finest we ever raised.—Mrs. Ellen C. Johnston, 108 Prospect St., Manchester, Ia.

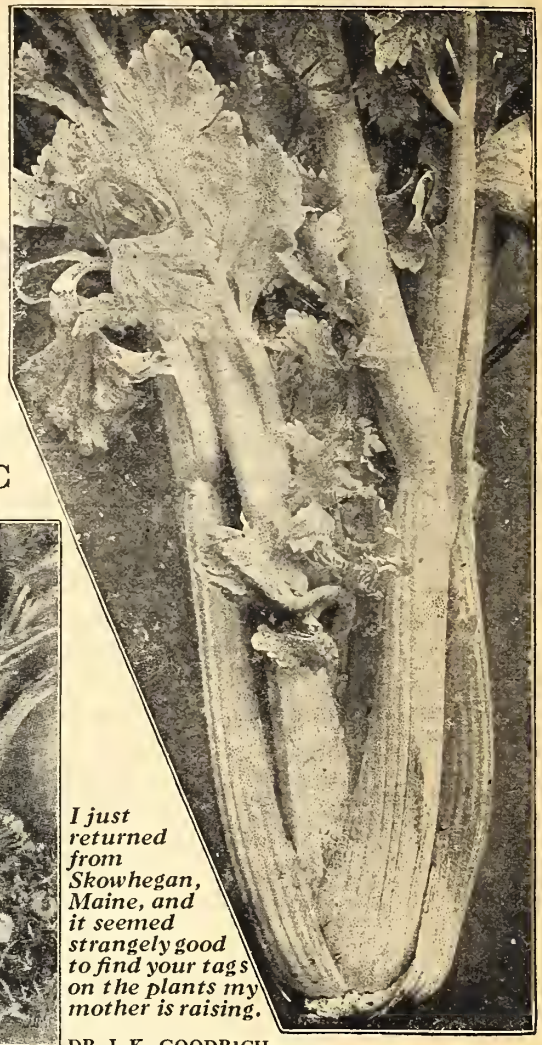
SALZER'S SELF-BLANCHER CELERY

Thick Heavy Stalks, Beautiful, Silvery White Color

Salzer's Self-Blancher has been bred from the White Plume, over which it is a great improvement. It blanches more readily, is earlier, grows more stalks, is heavier and is a much better keeper than the old variety.

Next to Salzer's Wonderful it is the earliest celery that can be grown. We introduced Salzer's Self-Blancher a number of years ago and have kept on improving it year after year, and we believe that now it is more largely grown than any other self-blanching variety. It has certainly become renowned for earliness, beauty, quality and flavor. Is of dwarf and compact habit, with light green foliage, stalks are thick and solid, unusually meaty, of a delicious rich flavor, pure white, heavy, tender and crisp. As it keeps so exceptionally well, it is widely grown for fall and winter use.

Many people who have never been able to grow celery before can grow this one to perfection, and succeed with it as well as with other vegetables. Salzer's Self-Blancher is singularly free from the habit most other blanching varieties have of reverting back to the original green celery. To obtain best results, celery should have rich, well-manured soil and plenty of water. For the earliest crops, seed should be sown in boxes in February or March, and for the Fall or main crop, it may be sown in the open ground as early as the ground can be worked into good condition. **334—Pkg., 15c; oz., 40c; 2 oz., 73c; ¼ lb., $1.35; ½ lb., $2.55; lb., $4.95, postpaid.**



I just returned from Skowhegan, Maine, and it seemed strangely good to find your tags on the plants my mother is raising.

Salzer's Self-Blancher

TURNIP ROOTED CELERY OR CELERIAC

Differs from other celery in that the roots are cultivated for use instead of the tops. Used for soups, stews and salads, or boiled like Parsnips or Turnips. It has a rich, meaty, distinct celery flavor and it deserves much wider cultivation, as it has real merit. Keeps well. Seed should be sown and given the same treatment as celery, but the plants do not require earthing up.

LARGE EARLY ERFURT—This turnip rooted celery is ready for use in June, if planted early. Considered the earliest of this variety of celery. The flesh is pure white, very tender, not woody, and of finest quality. **351—Pkg., 10c; oz., 20c; 2 oz., 36c; ¼ lb., 67c; lb., $2.50, postpaid.**

GIANT PRAGUE—Excels in quality, size and appearance. It is the main crop variety, nearly globe shaped, reaches a large size, and has few rootlets at the bottom. Splendid keeper. Flesh richly flavored, tender and greatly prized either cooked or as a salad. **352—Pkg., 10c; oz., 19c; 2 oz., 34c; ¼ lb., 63c; lb., $2.35, postpaid.**

Black Beauty Egg Plant

Egg Plant

Egg Plant seed germinates slowly and should be started under glass, with moderately high temperature, about March 1st. When about 3 inches high, transplant carefully to the garden or field, but not until all danger of frost is over.

SALZER'S NEW YORK PURPLE—Salzer's New York Purple is the principal market variety; it is early, prolific and entirely spineless. Extra large fruits, weighing several pounds each, with a circumference of twelve to fifteen inches, have often been grown of this strain, and as much as thirty pounds of fruit from one plant. The fruits are of deep purple color, quite smooth, and have white delicious flesh. Ready for table in about 95 days.

494—Pkg., 10c; oz., 38c; 2 oz., 68c; ¼ lb., $1.32; ½ lb., $2.59; lb., $5.00, postpaid.

SALZER'S BLACK BEAUTY—A most desirable variety for the home garden and truckers, especially in the North, as it is quite early, maturing ten to twelve days ahead of the New York Purple. The fruits are broad, thick, symmetrical in shape, of a rich, lustrous purplish black color, and of splendid flavor.

492—Pkg., 10c; oz., 50c; 2 oz., 86c; ¼ lb., $1.62; ½ lb., $3.12; lb., $5.95, postpaid.

Salzer's Independence or 4th of July Corn

The Largest Eared, Heaviest Yielding, Extra Early Sweet Corn

Our sales of this Sweet Corn have been enormous and are increasing from year to year. Our supply, although always larger than that of the preceding year, generally has been exhausted before the end of the season. We do not hesitate to say now that more of Salzer's Independence Corn has been planted all over the country in the last few years than of any other extra early sort.

Comparative tests made in our trial ground prove Salzer's Independence far superior in size, productiveness and delicious quality to any other first early variety; the many testimonials we have received, a few of which are printed here, show the satisfaction this corn has given wherever used.

The stalks grow about 5 feet high and produce generally from 2 to 3 fine long ears, 8 to 10 rowed and about 10 inches long, which are very symmetrical and handsome. The grains, which are tightly set, are small, deeper than broad, very white, and are of an exquisite fine quality, usually found only in the later sorts. Quite often reports have reached us of ears of our Independence Corn having been in edible condition in 45 to 50 days from planting the seed, and if sown in the fore part of May in our section in a favorable season, luscious ears of this variety should surely be ready for the table by **July the 4th.**

Salzer's Independence or Fourth of July Corn, an introduction of ours of over a quarter of a century ago, yields first place for extreme extra-earliness to Salzer's Honey Boy, but only in this respect. It is the LARGEST EARED and HEAVIEST YIELDING EXTRA EARLY SWEET CORN, bar none. A great seller at market. **Sixty days from planting** one should pluck mature sweet corn, so that at your Independence Day dinner you can serve sweet, luscious, tender, finest quality corn on the cob—**ears 10 inches and more in length,** each having 8 to 10 rows, symmetrical, handsome, and tapering gradually to a pointed tip.

It is grown successfully everywhere. Mr. W. A. Zimmerman, 530 Gartland Avenue, Sandusky, Ohio, writes, **"Your 4th of July Sweet Corn is the best I ever heard of and I want some more of it this year."** Mrs. Herman Allgner, Brainerd, Minn., writes, **"Your Independence Sweet Corn and your tomatoes sure can't be beat."** Mrs. J. W. Rector, Rangely, Colo., writes, **"From a small corn patch in my garden I picked 1,250 ears of your Fourth of July Sweet Corn."** Mr. John Van Vorst, 712 So. 1st Ave., Fargo, N. D., writes, **"My garden is 50 x 100 feet and from the corn patch I gathered 75 dozen ears of your Independence Sweet Corn. Your seeds were all first class."**

Let's sum up the whole matter on Salzer's Independence Corn. Every market gardener, every citizen, everybody planting same, finds that he has about the largest Earliest Sweet Corn grown, and that it is from five to twenty days earlier than other sorts. Then he finds it is sweeter than the sweetest Sweet Corn known to the trade today. Customers praise it as the very sweetest, earliest, finest Sweet Corn offered. If you have never planted it, don't pass it by this year,—be sure to give it a trial.

Salzer's Honey Boy Sweet Corn

SALZER'S HONEY BOY

See Illustration Above

Earliest, unusually sweet, high in sugar content, handsome, attractive, tender and juicy. Introduced by us about eight years ago, this distinct and superior strain has been universally displacing every other variety in popularity. It is popular with the market gardener, as maturing in 55 days in this northern climate, it enables him to get the first edible sweet corn to market and to reap the consequent high prices. Popular with the home gardener as it enables him to grow delicious, melting quality sweet corn for his table in an astonishingly short time. We control the entire supply of Salzer's Honey Boy. Get your seed from us and you will be sure of genuine, true seed.

Developed for a short season, **it is the best extra early sweet corn for any district and especially for the entire Northwest.** Like all extra-early varieties, the stalks are slender and grow 3½ to 4 feet high, and the ears are about sixteen inches above the ground. Being a free stooler, it shoots up many stalks, hence is a heavy yielder. Ears are straight and uniform, handsome, nicely rounded at the tips, average 8 inches in length and contain 8 to 10 rows of creamy white, fat, plump, juicy and unusually sweet and delicious kernels.

366—Pkg., 11c; lb., 37c; 2 lbs., 65c; 5 lbs., $1.34, postpaid. Not prepaid, 10 lbs., $2.15; 25 lbs., $4.95; 50 lbs., $9.15.

SALZER'S MAMMOTH WHITE CORY

See Illustration Below

The best second early variety and largely planted by market gardeners to follow the extra early sorts like Honey Boy, Salzer's Independence, etc.

The plants are vigorous growers, of medium size; they are very prolific, bearing at least two ears to a plant. The ears are seven to eight inches long and twelve-rowed. The grain is large, broad, very white and of sweet, delicious quality. A splendid seller in every market and of exceptionally fine quality for the table.

374—Pkg., 10c; lb., 31c; 2 lbs., 53c; 5 lbs., $1.11, postpaid. Not prepaid, 10 lbs., $1.64; 25 lbs., $3.75; 50 lbs., $6.80.

EARLY MINNESOTA

A favorite variety only a few days later than Cory and one of the most productive early sorts.

The stalks grow six feet high, produce two eight-inch long ears which are covered with 8 to 10 rows of broad kernels, which are tender and sweet. A good variety for the market as well as for the private garden.

369—Pkg., 5c; lb., 29c; 2 lbs., 49c; 5 lbs., $1.02, postpaid. Not prepaid, 10 lbs., $1.50; 25 lbs., $3.35; 50 lbs., $5.95.

SALZER'S GOLDEN SUNSHINE SWEET CORN!

THE NEW EARLY YELLOW SWEET CORN

THE NEW BILLION DOLLAR CORN!

Market Gardeners—You who plant for market, prepare to pay a higher income tax this year! You can't help it! With Salzer's extra-early, new, golden corn, you are going to get top market prices! Sells like wild-fire everywhere.

SALZER'S GOLDEN SUNSHINE SWEET CORN

is a new type of Golden Bantam Sweet Corn, having the same fine characteristics as its progenitor but with this advantage—it is about ten days to two weeks earlier. It was developed by Prof. A. F. Yaeger of the North Dakota Agricultural Experiment Station, who for several years had been breeding an earlier type of this luscious and popular sweet corn, and we are very proud indeed to be able to offer this new corn to our customers. We urge you to order early.

Stalks are 4½ feet high, usually carrying 2 or more fine ears about 7 inches long which are 8-rowed and packed with broad, deep, rich golden yellow kernels of the most sugary, tender and luscious quality that has ever been produced. Matures about 10 days to two weeks earlier than Golden Bantam! Whether for your own garden or for the market, don't fail to plant it this spring.

Truly, Salzer's Golden Sunshine Sweet Corn is a Billion Dollar Corn! Anyone who sells at market, knows the premium the good housewives pay for the extra-early supplies of cabbage, lettuce, sweet corn, tomatoes, etc. **Every gardener who planted Golden Sunshine last year, has definitely and positively determined upon a much larger planting this year.**

Every home gardener who planted it, remembers with satisfaction the early date at which the delicious, juicy, tender, sugary cobs of golden corn were served steaming hot at the table! Sweet corn is best when it is a little out of season, and Golden Sunshine is so early, it is really eaten out of season. Everywhere, customers sing its praises in the highest terms. **406—Pkg., 12c; ½ lb., 23c; lb., 39c; 2 lbs., 71c; 5 lbs., $1.46, postpaid. Salzer's Golden Bantam Corn

Profitable Yielder

Deliciously Sweet

An early, hardy, dwarf growing variety, and one of the most popular in cultivation today. **Salzer's Bantam is nationally famous for producing the most delicious, the sweetest, tenderest, and most richly colored, golden yellow sweet corn.** It matures in 70 days. Many of our customers who prefer Salzer's Golden Bantam to any of the white corns are planting it at regular intervals to obtain a continuous supply during the season, and in our latitude it can be sown as late as the middle of July, and will furnish corn for the table before frost. It is of extreme hardiness. The stalky plants grow from 4 to 5 feet high and each stalk usually bears 2 and more good ears, which are 6 to 7 inches long, straight, rounded at the tips, **of a rich, golden yellow color, Srowed and packed with broad, deep, tender kernels,** exceptionally meaty and of the very finest flavor. For early, medium early, or late, many of our customers will plant only Golden Bantam. But they use Salzer's Seeds, for best results are only to be had when they "Sow Salzer's Seeds."

372—Pkg., 10c; lb., 32c; 2 lbs., 55c; 5 lbs., $1.14, postpaid. Not prepaid, 10 lbs., $1.74; 25 lbs., $3.95; 50 lbs., $7.20.

Stowell's Evergreen

EARLE'S EARLY EVERGREEN

It is the finest and the earliest of the large-eared intermediate varieties which fill up the gap between the early and the late corns, being about a week to 10 days later than such early sorts as Mammoth White Cory, Early Minnesota, etc., and about two weeks earlier than Stowell's Evergreen. Earle's Early Evergreen produces quite large ears, which are 12 and 14-rowed and of superlative quality.

The ear measures 10 to 12 inches. In color the kernels are pure white, and are very sweet, tender and palatable. Earle's Early Evergreen is a prolific variety and matures in about 70 days. The large, well-filled ears command a quick sale in any market and we recommend this variety to market gardeners, as well as for use on the home table.

393—Pkg., 10c; lb., 30c; 2 lbs., 51c; 5 lbs., $1.06, postpaid. Not prepaid, 10 lbs., $1.58; 25 lbs., $3.54; 50 lbs., $6.40.

STOWELL'S EVERGREEN

The standard main crop variety. A fine all-around table variety of excellent quality. Stowell's Evergreen is a late sweet corn and takes a good time to mature. The stalks are strong and vigorous, grow 6 to 7 feet high, and bear abundantly, ears that are 8 inches long, each with fourteen to eighteen rows of pearly-white, sugary, deep-set, tender, melting kernels of excellent quality. Under good conditions each stalk has three ears. For the home garden, the market, or the canneries, it is always an immense success. If planted at the same time as the early and second early sorts, it will keep your table supplied until October. **More Stowell's Evergreen is grown for commercial canning than any other variety.**

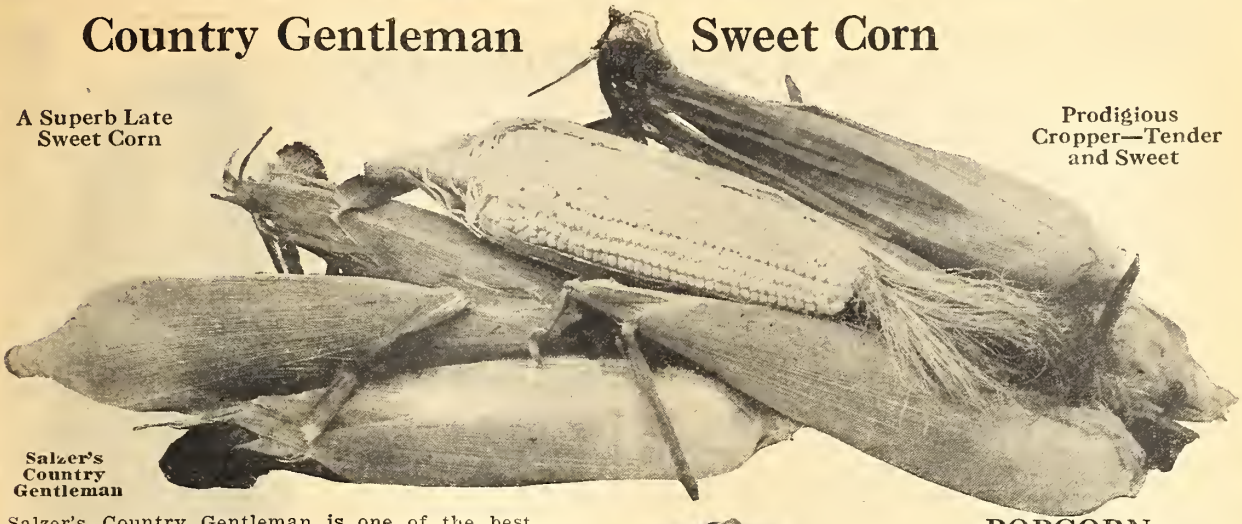
Country Gentleman Sweet Corn

A Superb Late Sweet Corn

Prodigious Cropper—Tender and Sweet



Salzer's Country Gentleman

Salzer's Country Gentleman is one of the best late sweet corns. Has a small white cob, closely packed with perfectly round kernels, irregularly arranged, slender and very deep, resembling "shoe-pegs." Because of this long, deep kernel, **it is admirably adapted for canning.** Stalks grow 6 to 7 feet high, bearing 2 to 3 ears each.

Ears are 8 to 9 inches long with a narrow, core-like cob, and are of a delicious sweetness, tender, juicy, and remain "in the milk" longer than other varieties as they are encased in a heavy husk. Matures in about 90 days. **392—Pkg., 10c; lb., 33c; 2 lbs., 57c; 5 lbs., $1.18, postpaid. Not prepaid, 10 lbs., $1.82; 25 lbs., $4.15; 50 lbs., $7.55.**

SALZER'S GOLDEN EVERGREEN

The late, main crop, yellow sweet corn. Salzer's Golden Evergreen is a cross between Stowell's Evergreen and Golden Bantam, and combines the size of ear of the former with the rich golden yellow and delicious buttery quality of the latter. The plants grow vigorously to a height of 6 to 7 feet, they are strong, profusely leaved, and each stalk bears two fine ears, seven to eight inches long, and packed with delicious golden grains in straight rows, of the finest and sweetest flavor. For the home garden it will be a real treat, and for the market it will bring fancy prices. It furnishes larger ears than the Golden Bantam, and as it is later, it prolongs the season considerably. Plant both Salzer's Golden Bantam and Salzer's Golden Evergreen for a continuous supply of yellow corn.

ENDIVE

Can be grown practically all the year round. Sow the seed in the open ground from the end of March until early June, and for a continuous supply, sow at intervals of from 3 to 4 weeks. For use, the plants must be blanched and this is done by gathering leaves together and tying loosely at top with a wisp of straw or soft twine for about two weeks.

SALZER'S MOSS CURLED—Salzer's Moss Curled is a dense cluster of leaves finely cut or lacinated, resembling a tuft of moss 10 to 12 inches in diameter. Rich green in color but blanch to a beautiful creamy white, with a piquant and crisp flavor.

Cucumbers

SALZER'S EARLIEST OR 40-DAY CUCUMBER

It is just a fraction smaller than the Prolific Pickle below, is very productive, and is of special value in districts where the late maturing kinds will not ripen. If the fruits are gathered continuously, the vines will fruit freely the entire summer.

A very early and extremely productive variety. Matures in about 60 days. The fruits average four to five inches in length. Diameter about one to one and a half inches. Rich dark green color. One of the best sorts for pickling, salads and slicing. Flesh white, crisp, cool and of pleasing flavor.

SALZER'S PROLIFIC PICKLE CUCUMBER

Plant Salzer's Prolific and Pick Basketsful of the Finest and Best Cucumbers for Pickling

Does it pay to plant Salzer's Northern Grown Seeds? Mr. Anton Endress, R. D. 1, Box 8, Springboro, Pa., writes, **"I received $642.00 on the market for my crop from 2½ lbs. of Salzer's Prolific Pickle Seed."** Think of such returns as that!

Salzer's Prolific Pickle is the one unbeatable pickling cucumber, it is enormously productive, it is uniform, it is a splendid shipper, it is early, it is of wonderfully fine quality. Housewives purchase it at market in preference to any other.

Slender, cylindrical, with large prominent spines, color dark green. Measures about 5½x2¼ inches, and has square ends, making it very attractive. The flesh is solid and thick in texture, and excellent in quality. The vines set fruit when young and usually continue to bear longer than any other variety. Matures in about 55 days. Mrs. Hector Huntington, Cumberland, Ind., writes, **"I picked and sold over 2,000 pickles from 1 Package of your Prolific Pickle."**

Market gardeners make huge profits with Salzer's Prolific.

Home gardeners first plant Salzer's Prolific and then if there is room, they plant other varieties. Be sure of good seed. Get it from Salzer's.

This variety will give you great satisfaction.

When freshly picked, the leaves are cooked and eaten like spinach. They do not lose much in substance by cooking and have a very agreeable flavor. Highly esteemed in warm countries for use as green vegetables.

Are easily cultivated and ready for use in six weeks from sowing. To those of our customers who have never planted Mustard, we recommend they give it a trial. Makes a deliciously pungent salad. Plants yield until frost.

Lettuce

SALZER'S EARLIEST LETTUCE

EARLIEST CURLED OR LOOSE LEAVED LETTUCE. DELICIOUSLY CRISP AND TENDER, EASIEST TO GROW

Yields an abundant crop of attractive light green leaves, heavily curled, of remarkably crisp texture, and of the finest flavor. The quality and flavor even of the outside leaves is fully equal to if not better than, the tender heart leaves of many heading varieties. Salzer's Earliest is the most widely planted in all sections of the country, and especially in the great West. It is such a strong grower that it thrives everywhere.

It is an admirable variety for outdoor planting, especially in early spring and it is also most suitable for greenhouse forcing. It is the lettuce for planting all summer long. Extremely popular for winter markets. The lower leaves grow clear of the ground so that it rarely suffers from rot. It is an ideal shipper and will prove most profitable for the grower, whether he sows seed in a hotbed or out of doors. It is the best non-heading lettuce for the home garden. Salzer's Earliest Lettuce affords crisp, tender, attractive, finest quality leaves long before the heading sorts have commenced to close up.

540—Pkg., 15c; oz., 20c; ¼ lb., 59c; ½ lb., $1.05; lb., $1.95, postpaid.

SALZER'S PRIZEHEAD LETTUCE

Is one of the best and most reliable varieties for all-year-around cultivation. The name is a trifle misleading, as it is a loose leaved or curled variety, and **does not make a head.** Plants form a loose cluster of leaves which are exceedingly tender, quite blistered and crumpled, sweet, crisp, and are of light brown color varying to a medium green base. It is one of the best home garden varieties as it grows quickly and makes a lot of good eating leaves which are of remarkably good flavor. Salzer's Prizehead reaches a very large size without losing its tenderness or crispness. Because of this unusual tenderness, it does not stand shipping well to distant markets. This superb strain was introduced in about 1875 and for many years we have been developing and re-selecting it at Cliffwood Farms, so that our seed of this variety is unsurpassed in quality, regardless of price.

575—Pkg., 9c; oz., 13c; ¼ lb., 37c; ½ lb., 68c; lb., $1.30, postpaid.

BLACK SEEDED SIMPSON

One of the standard varieties. A non-heading, curled, bunching, crisp variety, attractive light green color. It reaches a large size, grows quickly, is early, of fine quality, tender and sweet, and thrives splendidly during the hot summer months. Easily grown by the home gardener and much used by market gardeners for hot bed culture.

554—Pkg., 5c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25, postpaid.

WHITE SEEDED SIMPSON

Also known as Early Curled Simpson. A curled or crisp non-heading type, medium large, much crumpled leaves of a light green color. It is an early growing, hardy variety and **is sure to give fine results even under unfavorable conditions.** Tender, crisp and of excellent quality.

559—Pkg., 9c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25, postpaid.

SALZER'S GRAND RAPIDS

Curled or crisp, non-heading, light green, leaves wavy, fringed and very curly, a good shipper. Very popular and widely grown.

541—Pkg., 10c; oz., 14c; ¼ lb., 38c; ½ lb., 72c; lb., $1.35, postpaid.

Cliffwood Summer Header

Best Hot Weather Variety

CLIFFWOOD SUMMER HEADER LETTUCE

A superb new lettuce that we introduced in 1927. For years we had been working to develop a lettuce that would form solid heads despite hot weather, a thing which has hitherto been almost impossible. **We finally developed this grand new strain which heads during the heat of summer! In severe tests on our great Cliffwood Farms, practically every plant formed a fine, firm, solid head of butterhead lettuce of the finest flavor, despite very hot weather.**

The leaves are light green, crumpled, thick and tender, blanching to creamy white in the center of the head. Heads are large, about 8 to 10 inches in diameter, they have a delicious rich, buttery flavor, and they are the last to go to seed. It stands heat better than any other variety, without wilting. Be sure to give it a trial this year. **577—Price of Summer Header Lettuce: Pkg., 14c; oz., 20c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50, postpaid.**

SALZER'S CRISP AS ICE

A beautiful lettuce of medium size and medium early. Salzer's Crisp As Ice is a **cabbage butter head lettuce,** the leaves having a rich, attractive, deep green base, and upper portion covered with dark brown, giving the plant a deep brown or bronze appearance. A cool weather variety, valuable for both early spring and fall.

This head lettuce, when cut open has such a rich, **creamy heart, and is so tender and brittle,** that when it was introduced in about 1894, it was immediately and rightly named Crisp As Ice. It enjoys a wide popularity and is extensively grown. We recommend Salzer's Crisp As Ice unreservedly for the home gardener. Mr. H. J. Welker, Myerstown, Pa., writes, **"Your Crisp As Ice Lettuce has proven all you say about it. We never tasted such crisp and fine lettuce."**

556—Pkg., 12c; oz., 20c; ¼ lb., 56c; ½ lb., $1.05; lb., $1.95, postpaid.

CALIF. CREAM BUTTER

Salzer's California Cream Butter is a cabbage, butter head type, with thick leaves, large in size, of a beautiful and attractive rich dark green, tinged and spotted with brown. Ideal for the home garden. The heart of this excellent head lettuce is a rich golden yellow and has a most agreeable and delicate buttery flavor, hence the name Cream Butter. **It is of first class quality, it is a good shipper, and it forms a fine solid head under any ordinary conditions.**

561—Pkg., 10c; oz., 13c; ¼ lb., 40c; ½ lb., 75c; lb., $1.45, postpaid.

SALZER'S NEW YORK OR WONDERFUL LETTUCE

Salzer's New York or Wonderful

A curled or crisp, heading variety, large, dark green and slightly curled on the edges. It is the most extensively grown of any of the head lettuces by market gardeners, and it is likewise in much favor with home gardeners everywhere. The mature head is flattish globular, and has well folded leaves with the immediate outside leaves slightly incurved to protect the head from sunburn. Salzer's New York is easily identified at all stages of its growth. Do not confuse this variety with Iceberg, which, although somewhat similar, has a decided brown tinge to it, while New York is green.

Because of its immense size, fine color, crisp tenderness, and delicate flavor, it is always in demand in hotels throughout the country. The heads range from 16 to 18 inches in diameter and weigh from 3 to 3½ pounds each. This is the same variety that is so widely grown in California and the heads shipped in carload lots by the thousand. Mr. Jacob Scherer, 618 W. 3rd St., Mt. Vernon, Ind., writes, **"Your Wonderful Head Lettuce was the best lettuce I ever had. All the other seeds were fine, too."**

The heart is beautifully blanched, creamy white, crisp, tender, and free from any trace of bitterness. It is robust and is a standard hot weather variety anywhere. Although more expensive than other varieties, it is one of the most generally grown, because of the phenomenal crop it produces.

565—Pkg., 10c; oz., 17c; ¼ lb., 55c; ½ lb., $1.05; lb., $2.00, postpaid.

SALZER'S MAY KING

Salzer's May King is a cabbage, butter head type, medium small, light green, tinged slightly at edges with brown. It is a very early head lettuce and especially good for outdoor culture, very popular and very suitable for both home gardeners and truckers. The heart is well folded, solid, and blanches to a beautiful light golden yellow. It is tender, brittle, juicy, and of a fine buttery flavor. Very hardy, and a sure header under even unfavorable conditions.

560—Pkg., 10c; oz., 14c; ¼ lb., 38c; ½ lb., 72c; lb., $1.35, postpaid.

SALZER'S BIG BOSTON

Salzer's Big Boston is a cabbage head, butter type, medium large, about 11 inches across, finely shaped, globular, medium light green with a slight tinge of brown on margins of outer leaves. It is early and hardy, and stands shipping well. The leaf is smooth and is practically not blistered or crumpled, with a tendency to a bright sheen. Heads are tender, brittle, juicy, fine buttery flavor, and the interior is an attractive light golden yellow.

553—Pkg., 5c; oz., 12c; ¼ lb., 37c; ½ lb., 71c; lb., $1.35, postpaid.

SALZER'S IMPROVED HANSON

Exceptionally early, large globular, crisp heads which are firm and well blanched. The leaves are broad, crumpled and twisted, of light green color, never spotted or brownish. It is of very sweet flavor, and succeeds everywhere and at all times. Heads well during hot weather. Miss Agnes Sandford, 431 No. First Ave., Canton, Ill., writes, **"I have never had such fine head lettuce as last year, when I planted your Improved Hanson Lettuce. Friends all remarked about it."**

562—Pkg., 10c; oz., 16c; ¼ lb., 43c; ½ lb., 79c; lb., $1.50, postpaid.

PARIS WHITE COS LETTUCE

The Cos Lettuces are distinguished from other lettuces in that their leaves are elongated and almost always somewhat spoon-shaped. They are grown in exactly the same way as other lettuce.

When young, the leaves are pale green. When full grown, they form a loose, conical head, outer leaves light green and rather crimped, inner leaves very pale green with the midrib white and very prominent. Very crisp and has a delicious flavor.

Succeeds very well everywhere, never wilts under the severest sun and can be grown to an immense size; plants weighing six pounds have been grown of this variety.

598—Pkg., 10c; oz., 15c; ¼ lb., 40c; ½ lb., 75c; lb., $1.45, postpaid.

Planted your New York Lettuce last year and it was the finest in town; heads weighed nearly 4 pounds.—E. M. Snyder, Box 184, Enterprise, Ore.

Mangels and Sugar Beets

SALZER'S EIFFEL TOWER MANGEL

Both Mangels and Sugar Beets require deep, well enriched soil. Sow in May or June in rows 1½ to 2 feet apart and 8 inches apart in the row. Sugar Beets and Mangels improve the health and condition of animals, increase the flow and quality of milk, cut down your fodder bills, and give your stock a varied diet. If you keep only one cow, you should grow a small patch for winter feed. They make excellent and rich feed for poultry. Sow 5 pounds per acre in drills, 15 to 20 pounds per acre broadcast. For winter, store in cellar or pits.

Salzer's Eiffel Tower Mangel yields enormously. It is the heaviest cropping and largest of all mangels. The roots grow uniformly from ½ to ⅔ above the surface and are often 2 feet and more in length and 6 inches in diameter. The skin is bright red and the flesh is white tinged with rose. Of fine quality and exceptionally high feeding value. A wonderful yielder, and we recommend it strongly. Your stock will thrive on this splendid and most popular variety.

The Eiffel Tower Mangel again and again fairly covers itself with glory, and calls forth unanimous praise from thousands of farmers. Eiffel Tower stands away ahead of every Mangel yet tried. It is mammoth in size, a specimen having been grown under irrigation in Arizona WEIGHING 104 POUNDS.

The Mangel is enormously, wonderfully prolific. Its yield is fabulous, 1,000 to 1,800 bushels is nothing uncommon on good soil. It is easily harvested, growing well above the ground. Its quality is of a high order, and is greatly relished by all cattle, giving a wonderful flow of milk, and is an excellent food for fattening.

1489—Pkg., 10c; oz., 15c; ¼ lb., 30c; ½ lb., 55c; lb., $1.00; 5 lbs., $4.25; 10 lbs., $7.95, postpaid.

DANISH SLUDSTRUP

A superb new Mangel from Denmark. After careful trials, the Danish government states that they found it to yield more heavily and to produce more food value per acre than any other variety. Sludstrup grows to a large size, it is thicker than Mammoth Long Red but not quite as long, and it can be easily harvested as it grows about ⅔ above ground. The roots are of a deep yellow color, smooth and handsome, and have small tops and very few side roots. Stock eat it greedily. Danish Sludstrup is very rich in nutritive content.

1498—Pkg., 8c; oz., 12c; ¼ lb., 28c; ½ lb., 45c; lb., 80c; 5 lbs., $3.75; 10 lbs., $6.95, postpaid.

MAMMOTH LONG RED MANGEL

A very prolific strain and an abundant yielder. Frequently reach a length of about two feet, grow about one-half above the surface, and the tonnage per acre on rich or well-fertilized ground is something immense. We recommend this strain next to Eiffel Tower, for size, quality and yield. Skin is deep red and flesh is veined with rose-pink. Ranks very high in nutritive value and is greatly relished by stock.

1496—Oz., 8c; ¼ lb., 22c; ½ lb., 35c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.50, postpaid.

GOLDEN TANKARD MANGEL

A smooth, yellow-fleshed Mangel, high in saccharine content and in milk producing qualities. Yields immense crops and is easily harvested. Roots are heavy and solid, of a thick and typical tankard shape, tapering quickly at the bottom which is quite broad, with only a small tap-root. The flesh is firm, rich deep yellow color, and it is an excellent keeper. Cattle never tire of it.

1495—Oz., 10c; ¼ lb., 24c; ½ lb., 40c; lb., 70c; 2 lbs., $1.30; 5 lbs., $2.95, postpaid.

COLOSSAL SUGAR BEET OR HALF SUGAR MANGEL

Highly nutritious and easily stored for winter. Containing a large amount of sugar. It is superior to Mangels for stock-feeding purposes. Twice as productive as Sugar Beets. Roots are of oval shape, green above and white below the ground, flesh white and sweet. Extensively used for stock feeding. It is a heavy cropper. Mr. Herman K. Schulze, R. D. 24, Ransomville, N. Y., writes: **"I raised from your seed a Colossal Sugar Beet weighing 21½ pounds of which I am enclosing a picture. The beet was 23 inches long."**

1481—Oz., 8c; ¼ lb., 22c; ½ lb., 35c; lb., 60c; 2 lbs. $1.10; 5 lbs., $2.50, postpaid.

KLEIN WANZLEBEN SUGAR BEET

More extensively grown than any other variety for making sugar; used almost exclusively by all sugar factories. The average yield is from 15 to 20 tons per acre with about 18 per cent sugar. Our seed is pedigreed stock, producing roots testing highest in sugar content. **1482—Pkg., 10c; oz., 15c; ¼ lb., 25c; ½ lb., 46c; lb., 85c; 2 lbs., $1.60; 5 lbs., $3.75, postpaid.**

Muskmelons

Green Flesh Varieties

SALZER'S EARLIEST RIPE MUSKMELON

Earliest of All. Our attention was called to this Melon many years ago by a market gardener near La Crosse, who for the past years has always had Muskmelons from 8 to 15 days ahead of his neighbors. These Melons were of uniform size, of fine shape and appearance, green fleshed, extremely delicious, and sold readily in our markets at from $1.25 to $2.00 per dozen, the profit to an acre being something enormous, as all the Melons were usually sold before other sorts came into the market.

THIS IS THE EARLIEST GREEN-FLESHED MUSKMELON that we know of, being ready for the market in about 60 days after planting. It is nearly round, as may be seen by the illustration, of good size, about five inches in diameter, and of a dark green color outside, heavily netted. The flesh is very thick, of a rich green color, sweet, luscious and melting, and the flavor is unsurpassed by that of any other variety.

Mr. E. E. Goetschel, 1919 Kansas Ave., Kansas City, Mo., writes, **"I sent to you for 1 lb. Earliest Ripe Muskmelon and began to sell melons early in July. Some of the stores would not believe that I raised them, but claimed I had shipped them in. They were wonderful quality and sold rapidly. Your seed gives big returns."** It is an enormous cropper, bearing for a long time. We sold more than 100,000 packages of this Earliest Melon last year, and we have made just that many thousand melon growers pleased, delighted and happy. If you want to make money on Earliest Melons there is no other variety in the wide world that you can plant that will give quicker returns than SALZER'S EARLIEST RIPE MUSKMELON.

Salzer's Famous Honey Ball

SALZER'S HONEY BALL

We are the introducers of this wonderful new Melon, which seems to be taking the country by storm. From our own trials and from reports from all over the country the Salzer's Honey Ball Cantaloupe possesses characteristics that make it one of the finest Cantaloupes that has ever been introduced. It is the result of a cross between the Texas Cannon Ball Cantaloupe and the Honey Dew Casaba Melon.

Salzer's Honey Ball averages a little larger in size than the Rocky Ford. Shape, round as a ball, slightly netted, and has a very thick wall of very delicious green meat clear to the rind. **Very small seed cavity, high sugar content and delicious flavor. The rind is hard and tough which makes it a splendid shipper.** Color of rind greenish white until fully ripe, when they turn to a light yellow. Very prolific, vines this year having as many as 25 fine Melons to the plant.

These melons, being of uniform size, pack nicely 12 to the crate, and frequently yield 600 dozen melons per acre. Grow best on sandy loam. Mr. H. W. Dohl, R. D. 1, Sylvan Grove, Kansas, writes, **"Your Honey Ball Muskmelons sold like hot cakes, at 30c to 40c each. I picked the last ones on October 23."**

620—Pkg., 10c; oz., 20c; ¼ lb., 67c; ½ lb., $1.29; lb., $2.50, postpaid.

EXTRA EARLY HACKENSACK

Also called Turk's Cap. **The flavor is sweet and delicious,** with green flesh. Has flattened ends, thick irregular ribs and is densely netted. A heavy yielder and very popular.

609—Pkg., 5c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25, postpaid.

SALZER'S SELECTED ROCKY-FORD

The standard green-fleshed shipping melon. It is round in shape, heavily netted, and runs very uniform in size. Thousands of cars of Salzer's Selected Rocky-ford are annually shipped great distances to market. It is one of the finest melons in cultivation, and is found on the bills of fare in all the leading hotels and restaurants of America. **The green flesh is firm, thick, of sweet and melting quality, and may be eaten close to the rind.** Seed cavity is unusually small. The netting is extremely well developed, closely laced of gray color, covering the entire fruit. The vines are of vigorous growth, disease-resistant and are enormously productive. Fruits average about 1½ pounds in weight, just the size demanded by hotels and restaurants. A great market variety and especially recommended for shipping. Matures in about 80 days.

604—Pkg., 5c; oz., 10c; ¼ lb., 29c; lb., $1.00, postpaid.

MONTREAL MARKET

The largest of all green-fleshed varieties, and the flavor is deliciously sweet. The fruit is nearly round, slightly flattened at the ends, with broad, regular, deep ribs, skin dark green, densely netted. Flesh is thick, light green, of luscious and melting quality. Because of its immense size, it is a fine variety for fairs and exhibition purposes. **612—Pkg., 5c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25, postpaid.**

Salmon and Yellow-Flesh Varieties

SALZER'S HEARTS-OF-GOLD

A highly rust-resistant and very profitable melon, which we introduced in 1927. Our sales of this superb variety were enormous and all who planted were most emphatic in their praises of Hearts-of-Gold. This highly flavored melon is the result of an accidental cross between Osage and Netted Gem. **It combines the thick, luscious, golden flesh of the Osage with the heavy netting and thin rind of the Netted Gem type of Rockyford, and averages 6 to 8 inches in size, making it an ideal basket and crate melon.** It is extremely resistant to rust, is remarkably hardy and withstands heavier frosts than other varieties. Matures in about 75 days. A grand variety for the market, private homes and hotels. **It is enormously productive and is in great favor everywhere.**

619—Pkg., 10c; oz., 13c; ¼ lb., 40c; ½ lb., 75c; lb., $1.45, postpaid.

SALZER'S JUICY FRUIT (Salmon and Yellow-Flesh Melons)

Salzer's Juicy Fruit, introduced by us six years ago, **is the grandest salmon-fleshed melon in cultivation today, it is medium early, it is wonderfully sweet, it is a heavy yielder, it is devoid of stringiness, it is very meaty and it has a small seed cavity.** In the short time we have been offering Juicy Fruit, it has become decidedly popular, not only with home gardeners, but also with truckers.

Mr. Chas. Haurigan, 425 W. Washington St., Fremont, Nebr., writes, **"Your Juicy Fruit Muskmelons were the finest we ever ate."**

The skin is an attractive light green, the fruits reach a very large size, they are nearly round with slight sutures, and the **thick salmon colored flesh is the sweetest, the most luscious, the most sugary flavored, that we have ever eaten.** The melons are uniform in size and pack nicely ten to a crate.

605—Pkg., 14c; oz., 20c; ¼ lb., 60c; ½ lb., $1.15; lb., $2.25, postpaid.

SALZER'S OSAGE

On the heavy soils where other varieties do not thrive, Salzer's Osage will succeed; in sandy soils it does even better and is a money-maker for gardeners. **It is very seldom that Salzer's Osage does not produce a fine fruit and it holds its rich flavor longer than many other sorts.** Splendidly adapted to the cooler climates. Matures in about 90 days.

Salzer's Osage is oval or egg shaped, thick, luscious salmon-colored flesh, slightly ribbed, dark green in color, and nicely netted. Skin turns to a mottled light and dark green as it ripens, with a trace of yellow. Although it will not ship great distances, it is very popular for near-by markets and is an ideal melon for the home garden. **642—Pkg., 10c; oz., 14c; ¼ lb., 38c; ½ lb., 72c; lb., $1.35, postpaid.**

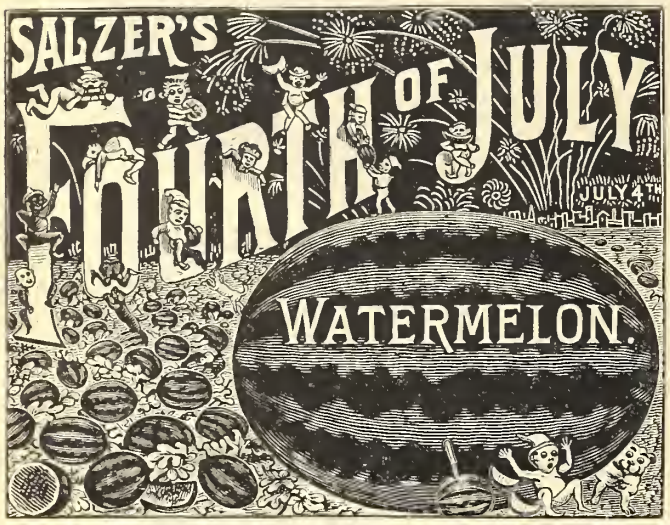
Salzer's Juicy Fruit Muskmelons have no equal in the U. S. A., nor Salzer's Giant Flat Dutch Cabbage.—Mrs. O. L. Jackson, R. D. 1, Box 117-A, Albuquerque, N. M.

Extremely early—A splendid strain for the North—Deliciously sweet—Easiest to grow—Sparkling red, crisp flesh.



SALZER'S EARLIEST WATERMELON

Especially bred and developed for those sections which have a short growing season, Salzer's Earliest is sure to be the first watermelon on the market, being fit for the table in about 60 days. On the La Crosse market, the earliest melons fetch prices of 50c to 80c each! Salzer's Earliest has been a money maker for market gardeners for years and is in no less demand by the home gardener who wants the very earliest, sweet, luscious watermelons for his own use.

Salzer's Earliest reaches a large size, weighing from 25 to 30 pounds, is rather round in shape, of an attractive light green color and striped irregularly with darker green. **It is enormously prolific, vines are vigorous and hardy and it is decidedly a short season melon and especially adapted for the North.** The sparkling, crisp, red flesh is of wonderfully fine texture, has a delicious and exceptionally sweet flavor and ripens down to the rind. Unusually uniform in size and shape, it is a splendid shipper, and is a leading market variety in all parts of the country. It is unquestionably the very best extra early watermelon grown and we strongly recommend it. Even in sections too cool to ordinarily grow a crop of watermelons, Salzer's Earliest will ripen and produce fine large melons.

667—Pkg., 10c; oz., 16c; ¼ lb., 43c; ½ lb., 79c; lb., $1.50; 2 lbs., $2.90; 5 lbs., $7.05, postpaid.

SALZER'S FOURTH OF JULY

A sure yielder, a heavy cropper and second only to Salzer's Earliest as an extra-early watermelon. The melting sweetness of this superb melon, the delicious, exquisitely flavored flesh, its hardiness and ease of growth, have delighted gardeners everywhere. **As far north as Canada, Salzer's Fourth of July will supply the tables just as bountifully as it does in the sunny regions of the South.** Matures an abundant crop of first quality melons twelve inches long and nine inches in diameter, weighing about 25 pounds. The rich, red, fine-grained flesh ripens clear to the rind and is most luscious and refreshing. Not suited for shipping but a grand melon for home use and near-by markets. Thrives even under neglect. Matures in about 65 days.

671—Pkg., 10c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25; 2 lbs., $2.30; 5 lbs., $4.95, postpaid.

SALZER'S RADIO

Introduced by us in 1926. Salzer's Radio Watermelon is large and heavy, the heaviest melon recorded, weighing 77 pounds 14 ounces, almost 78 pounds! It is long and thick, measuring from 15 to 18 inches in diameter and 26 to 29 inches in length. Matured melons have a glossy dark green rind, indistinctly striped with a lighter green, which is medium thick and tough, and hence insures long keeping and shipping to distant markets. The thick, red, sweet flesh of Salzer's Radio is entirely free from hard centers and shows no tendency to stringiness. **All who have eaten it, remark about its luscious quality and its splendid flavor. Seed cavity is small.**

It is enormously prolific. We have inspected fields where the owner predicted a carload of 40 to 45 pound melons per acre and every melon good and salable. Sells at local markets just as well as at distant markets and for just as high prices. Home gardeners who grow Radio will produce melons that will be the wonder of their community.

655—Pkg., 12c; oz., 25c; 2 ozs., 40c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50; 2 lbs., $4.90; 5 lbs., $12.00, postpaid.

Your King and Queen Watermelon kept perfectly until the middle of December.—William Dullard, Elgin, Iowa.

SALZER'S OH MY! MELON

The Largest Watermelon on Earth. In our latitude, by September 1st Melons of this variety have attained the enormous weight of 50 to 95 lbs.; they all grow to an enormous size. Oh, My! is an extremely prolific if not the most productive variety known. An acre will bear several thousand great Melons weighing all the way from 30 to 90 lbs., and each fit to be set before a king. The Melons are almost round in shape, of a peculiar dark brownish green color. The flesh is dark red, deliciously sweet.

We introduced this fine variety about thirty years ago and while for several years we had no seed and could not offer it, we have large and excellent quality stocks this year again. Our old customers will welcome Oh, My! and our new friends will find in it a most agreeable and deliciously sweet watermelon.

685—Pkg., 10c; oz., 16c; ¼ lb., 43c; ½ lb., 79c; lb., $1.50; 2 lbs., $2.90, postpaid.

SALZER'S IRISH GREY

Salzer's Irish Grey is a long melon, rather large in size and ranks high with leading shippers. The rind is yellowish light green in color, the seed is white and its average weight is 25 pounds. Eating qualities exceptionally good.

The red flesh is unusually sweet, free from hard centers or stringiness, very firm and compact and does not break when sliced. It ripens in about 90 days and stays in good condition for a long period; withstands long shipping.

699—Pkg., 7c; oz., 8c; ¼ lb., 22c; ½ lb., 39c; lb., 75c; 2 lbs., $1.40; 5 lbs., $3.25, postpaid.

HUNGARIAN HONEY

It not only ripens early (in 80 days) but it is deliciously sweet, with firm, solid, deep red flesh, and small seeds. Melons are nearly round, medium in size, weigh 8 to 12 pounds each, and rind is dark green. A heavy yielder. **The "sweet-as-honey" flesh compensates the grower for the rather small size.**

676—Pkg., 7c; oz., 9c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00; 2 lbs., $1.85; 5 lbs., $4.45, postpaid.

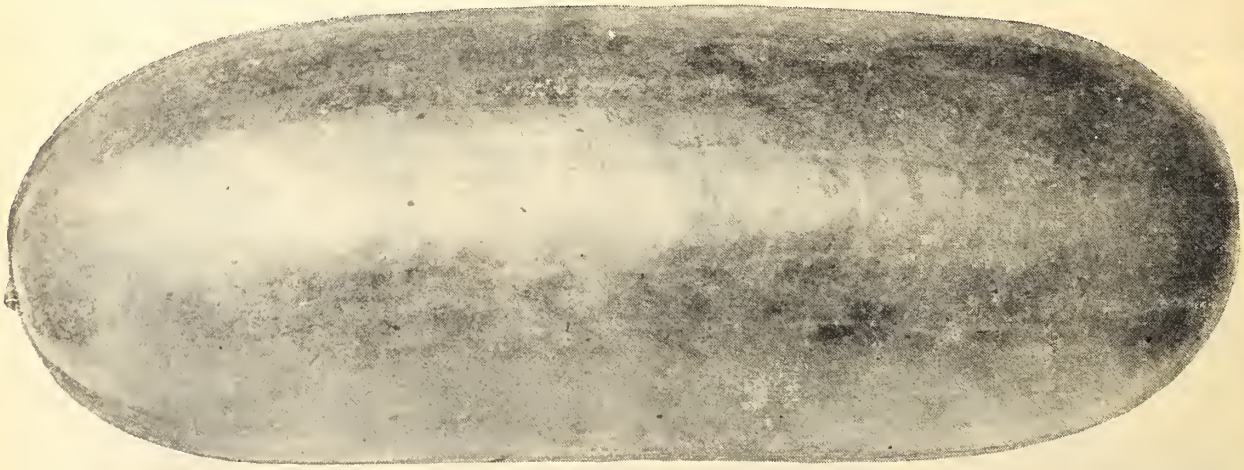
SALZER'S THURMOND GRAY

A distinct new variety that has appeared on northern markets in volume during the past recent seasons. It is a good producer, stands wet weather well, and so far has not been subject to the diseases that have damaged other melons. This new melon is long and thick. The rind is of a rich greenish gray color, which makes it very hard to sunburn. It is wilt-resistant. It is very uniform in its growth, being the same size at each end and makes the most perfect car pack of any of the varieties. It will weigh from 25 to 75 pounds. It has every quality necessary for perfect shipping.

656—Pkg., 8c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c; 2 lbs., $1.78; 5 lbs., $4.25, postpaid.

IMPROVED TOM WATSON—THE PRINCE OF WATERMELONS



Without a peer! A melon in a class by itself! Salzer's Tom Watson has surprised everybody by its rapid rise in popularity. It is unsurpassed as a shipper and the big, fine quality melons sell on sight at any market. De Groot and Son of Madison, Nebraska, write, **"Sold a load of 62 of your melons at market in 15 minutes."** This is a record seldom, if ever, equalled.

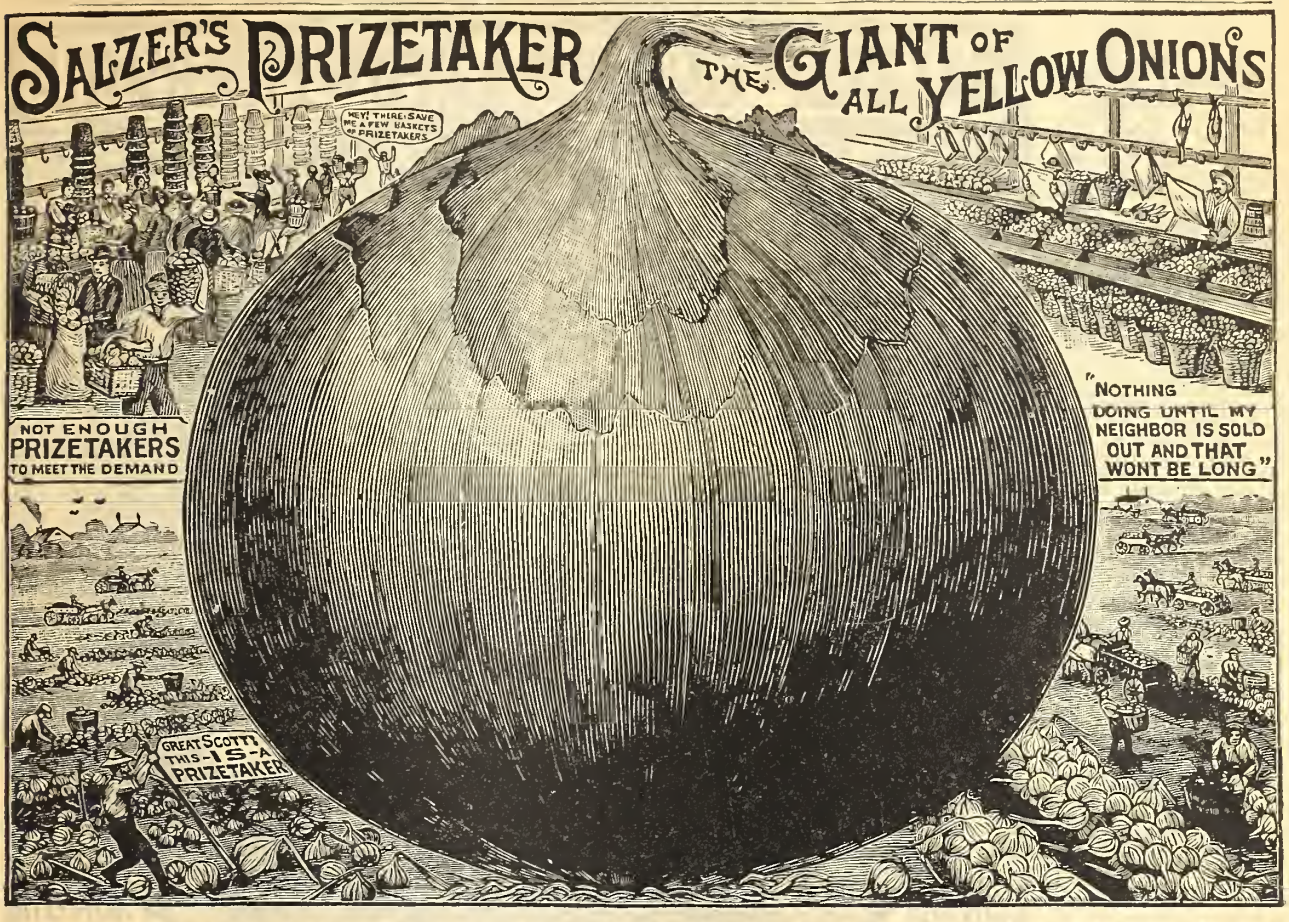
The seeds are brown with a sprinkling of white, the rind is deep green indistinctly veined, the shape is long and cylindrical and the melons often attain a weight of 40 pounds and more. The length averages 20 to 30 inches by 10 to 12 inches in diameter, and the deep red, firm flesh extends to within three-quarters of an inch of the rind. Is rather late in maturing.

It is a superior, tough, thick rind, shipping melon, adapted for long distance markets.

The vines are very vigorous and most productive. The flesh is rich red, crisp and of luscious flavor.

693—Pkg., 5c; oz., 8c; ¼ lb., 23c; ½ lb., 43c; lb., 80c; 2 lbs., $1.50; 5 lbs., $3.50, postpaid.

Have gotten seed from several different companies, but I believe Salzer's is the best. This is my second year with you.—V. A. Rozell, Mansfield, S. D.



Among large onions, Salzer's Prizetaker always attracts attention by its fine size and great beauty. **It is of the same type as the large Spanish onions that have been imported and sold at high prices. Plant Salzer's Famous Prizetaker this year and see what splendid size, what perfect symmetry, what delicious mildness, what fine even grain, what productiveness, what all-around attractiveness has been developed and bred into this onion at Cliffwood Farms.** No need for the large Spanish onions only to sell at high prices. They cannot be distinguished from Salzer's Prizetaker, and Salzer's Prizetaker is even more superior in delicious flavor and fine appearance. It always sells at sight and at high prices—seldom for less than 5c per pound. In addition, Prizetaker comes in at a time when other onions are scarce, so the price is always high. It is a money maker for the trucker and has always given the best of satisfaction to the home gardener.

Is of clear, bright straw color, very productive, beautifully globe shaped, has a very small neck and ripens up fine and hard. Flesh is pure white, crisp, extremely sweet and mild in flavor, being unequalled even by the Spanish onions. Keeping qualities not of the best, but this is no drawback, as the onions find a ready sale always, at higher prices than other onions. Succeeds well in all sections of the country; matures rather late, in 130 to 140 days. **748—Pkg., 10c; oz., 18c; ¼ lb., 61c; ½ lb., $1.16; lb., $2.25; 2 lbs., $4.35; 5 lbs., $10.65, postpaid.**

SALZER'S YELLOW GLOBE DANVERS

It is an excellent early variety, quick to mature, and is a remarkably good keeper. Because of its quickness in maturing it is an ideal onion to plant in the North. Yellow Globe Danvers is very productive, is an excellent keeper, is mild and full flavored, and has a uniform rounded shape, which is almost spherical. It is perhaps the best all around onion, and is very highly esteemed and very well liked by all those who grow only one variety. Of a rich, coppery yellow, it reaches 2½ to 3 inches in size, with coats numerous and closely set.

Extensively used for general cultivation for home and market. A main crop and standard yellow onion everywhere. Produces medium to large sized bulbs of a uniform globe shape that ripen very evenly. Necks ripen down small. It is a good, reliable shipper. Attractive, rich, yellow skin.

The flesh is creamy white, crisp, tender, mild and of fine flavor. For general table and cooking use this variety is unexcelled. Grows well anywhere in the United States. Matures in 120 days.

755—Pkg., 10c; oz., 15c; ¼ lb., 49c; ½ lb., 91c; lb., $1.75; 2 lbs., $3.35; 5 lbs., $8.15, postpaid. Write for prices in larger quantities.

SALZER'S SELECTED GREAT RED WETHERSFIELD ONION

The Most Largely Grown Red Variety—the Greatest Cropping and the Standard American Red Onion.

Large bulbs, flattened, but quite thick, with rich, dark purplish skin and pure white flesh of good, mild flavor. Our stock is well bred and will invariably grow crops quite free from necky and mis-shapen bulbs, and onions of the largest size averaging about ½ lb. each, but specimen bulbs of one and even two pounds have often been grown from our seed. Salzer's Great Red Wethersfield produces larger crops than any other American red onion and these bulbs keep longer in good condition than those of any other sort. It gives its largest yield on rich land, but on poor and dry soils it yields better than any other sort. It is a medium early kind, maturing in about 100 days, and is adapted to varied soils and to adverse climatic conditions. Has an exceedingly fine neck, and long, slender leaves of a clear green color.

From every section of America we have received glowing letters of the success our customers had with this splendid Onion, sweeping every state and county fair before them. One raised 16 bu. from 1 ounce; another 200 bus. from 1 pound; a third over 1,000 bus. per acre, etc.

This is the onion for the farmer, the citizen and the gardener to grow, to put in their cellars for the winter, because it is one of the easiest to grow, is certainly one of the best keeping Onions, always of excellent quality. It's the greatest money maker, because it is so heavy a yielder, and all Onions are so fine that they sell at good prices in all markets. John Honzik, Malin, Ore., writes, "My Red Wethersfield Onions, your seed, weighed from 1 to 2 lbs. each." **791—Pkg., 10c; oz., 17c; ¼ lb., 55c; ½ lb., $1.05; lb., $2.00; 2 lbs., $3.85; 5 lbs., $9.40, postpaid.**

AILSA CRAIG

A standard, popular, handsome variety, oval shaped and with pale, straw-colored skin. Flesh is white, crisp and juicy, and for a large onion it is a splendid keeper. Very mild, delicious flavor, and desirable for eating raw.

736—Pkg., 10c; oz., 17c; ¼ lb., 55c; ½ lb., $1.05; lb., $2.00; 2 lbs., $3.85; 5 lbs., $9.40, postpaid.

EARLY WHITE WELCH

Planted for green onions only; this variety does not form bulbs, but only a small enlargement at the base of each shoot; it is extremely early. It is a perennial and stays in the ground for years. Market gardeners will find it a profitable crop. **788—Pkg., 10c; oz., 25c; ¼ lb., 81c; ½ lb., $1.56; lb., $3.00; 2 lbs., $5.80, postpaid.**

GRANDPA'S CONGLOMERATION

Turn back in thought to the days of your youth, when Grandpa and Grandma planted the vegetable garden. There was always a large corner in which a mixture of different kinds of Onion seeds was planted on the theory that if one sort did not do well the other sort would, and in that way it happened always that there never was a shortage of Onions. If the good housewife wished a mild white for salads, it was always found therein; if she wished a more pungent one, that was taken and with this in view we have arranged **"Grandpa's Conglomeration Onion Mixture"**; it contains every known sort, all colors, shapes and sizes.

758—Pkg., 10c; oz., 15c; ¼ lb., 49c; ½ lb., 91c; lb., $1.75; 5 lbs., $8.15, postpaid.

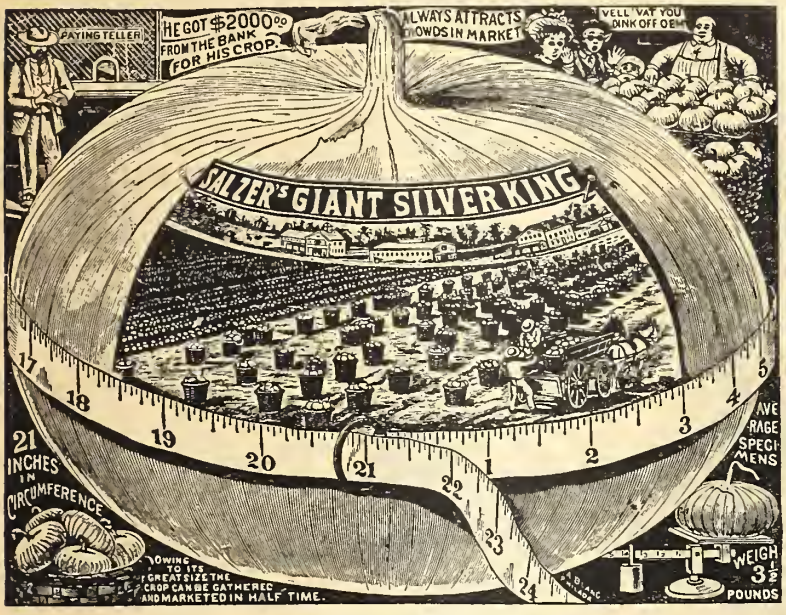
AUSTRALIAN BROWN

Unsurpassed in keeping qualities, early and a sure and heavy cropper. It is a hard variety, of medium size, with rather thick skin of a rich amber brown color. Flesh is white, fine-grained, very mild and sweet. Matures 105 days.

737—Pkg., 10c; oz., 15c; ¼ lb., 49c; ½ lb., 91c; lb., $1.75, postpaid.

Your Red Wethersfield Onions were extra nice; I think they were the finest around here.—John A. Wentworth, Moody, Me.

Salzer's Giant Silver King Onion



Each succeeding year the popularity of this Onion increases, gardeners, farmers and truckers grow more enthusiastic in its praise, and well they may, for this great Onion deserves every word of praise that can be spoken. Although we offered Silver King for the first time in 1884, we do not believe any other variety of vegetable excepting possibly our Giant Flat Dutch and Lightning Cabbage has since been more unanimously endorsed by one and all everywhere.

Salzer's Giant Silver King Onion is ideal for exhibition, fancy market or for the home table. **We have grown specimens at Cliffwood Farms, 22 inches in circumference instead of 21 inches as shown in the illustration, and weighing 4 pounds.** Matures early and is uniformly large and of fine shape, flattish round and thick. The silvery white skin is very thin and the fine grained, white flesh **is of such mild and deliciously sweet flavor that it can be eaten raw like an apple.** Fully grown, they measure five to seven inches in diameter; they mature evenly and keep well in storage. No other white onion attains such mammoth size, nor will any other white variety grow so uniformly large.

Mr. W. H. Mills, Star Route, Elgin, Nebr., writes, **"I purchased my Onion Seed from you and it was fine, clean seed, and not mixed. I raised a splendid crop of onions."** Mrs. J. M. Lampy, R. D. 10, Box 61, Celina, O., writes, **"I raised some of Salzer's Silver King Onions that weighed 3 lbs."** Mr. Laverne Hamilton, Box 191, 4-Mile Ranch, Musselshell, Mont., writes, **"I have never found anything that equals Salzer's Silver King Onions."** Salzer's Giant Silver King is enormously productive and every one desiring the largest and handsomest white onions of the finest flavor will be more than satisfied with this superb strain. Matures in 110 days.

742—Pkg., 10c; oz., 22c; ¼ lb., 74c; ½ lb., $1.42; lb., $2.75; 2 lbs., $5.35; 5 lbs., $13.10, postpaid.

SALZER'S EBENEZER

The mildest flavored onion we have ever tasted, and it will keep hard and sound all winter long. Flesh is white and crisp, rounded shape, straw colored skin. One of the best mild onions for the home garden.

Salzer's Ebenezer is a leading variety with gardeners everywhere because of its unusual keeping qualities, carrying through winter without loss, because of its pleasing flavor, attractive appearance, and its large uniform size. It is also equally valuable for the home gardener. Numerous testimonials received each year, bespeak the wonderful satisfaction this superb onion is giving.

765—Pkg., 10c; oz., 22c; 2 oz., 39c; ¼ lb., 74c; ½ lb., $1.42; lb., $2.75; 2 lbs., $5.35; 5 lbs., $13.10, postpaid.

SALZER'S NEW SWEET SPANISH ONION

Here is a grand, brand new, and entirely distinct onion that we introduced in 1926! It will mean a profit of from $200.00 to $300.00 more per acre than is possible with other onions. Salzer's New Sweet Spanish is so mild and sweet that it is simply delicious when eaten out of the hand like an apple.

It is one of the largest and one of the best all around onions ever produced. It is a fine, attractive, light yellow color. It is a dandy shipper. **It is of a handsome, large, globular shape, and the sparkling flesh is pure, clear white, tender, and remarkably sweet and luscious.** At Cliffwood Farms we picked up a few of these onions at random and placed them side by side on a yardstick. It took just seven to measure 36 inches, and they weighed 16⅝ pounds. **Once tasted, always grown. Sells like wildfire on any market and at the best possible prices.** Splendid for the home garden. Don't pass this by.

Salzer's New Sweet Spanish Onion

WHITE PORTUGAL OR SILVERSKIN

A very popular and widely grown white onion. **It is a splendid sort for growing white onion sets, pickles, and for early bunching green onions, and we urge every gardener to make a liberal sowing of this variety for continuous use.** The large, mature onion is of mild and pleasant flavor and is of somewhat flattened shape. A great seller on the market. **It is very popular** for family use, it is an ideal slicer and the smaller bulbs unsurpassed for pickling purposes. Matures quickly and may be sown as late as June to produce small pickling onions by fall. Keeping qualities are not of the best, but it is splendid for early winter use. Matures in 110 days.

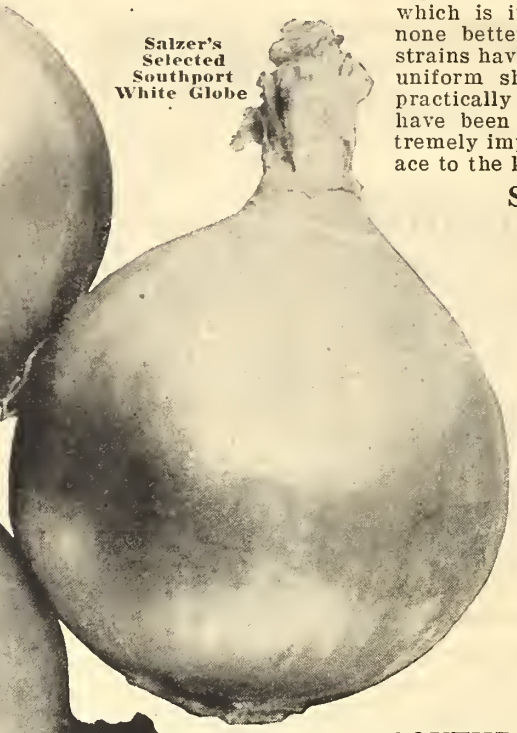
757—Pkg., 10c; oz., 25c; ¼ lb., 81c; ½ lb., $1.56; lb., $3.00; 2 lbs., $5.80; 5 lbs., $14.25, postpaid.

I will say that your Sweet Spanish Onion is a wonder—all you claim for it.—Wm. Dill, 124 N. Oak St., West Point, Nebr.

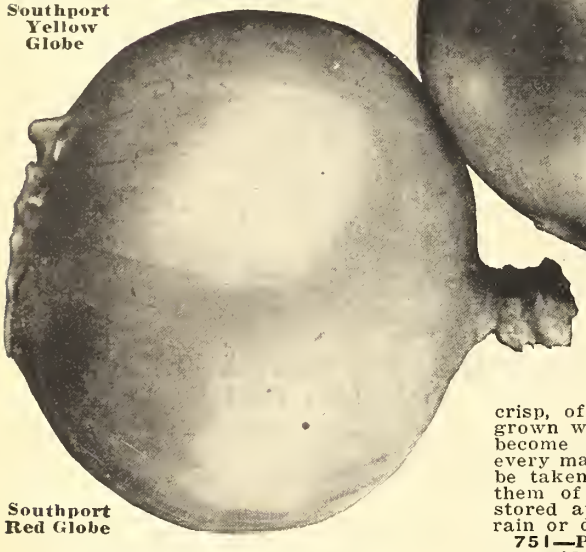
Salzer's Southport Globe Onions

Salzer's Select Southport strains reign supreme in the most severe test of an onion, which is its keeping quality. There are none better for keeping. Our Southport strains have been bred to produce the same uniform shape, and to leave the onions practically devoid of neck when the tops have been dried off. This feature is extremely important, as the necks are a menace to the keeping quality of the onions.

Salzer's Selected Southport White Globe



Salzer's Selected Southport Yellow Globe



Southport Red Globe

SOUTHPORT RED GLOBE

Salzer's Southport Red Globe onions are a most attractive variety, with outer skin a rich purplish-red. They have been bred to uniformity, as little neck as possible, and a size of about 3 to 3½ inches. They have a very attractive appearance, with the flesh faintly tinged a purplish-red. Southport Red Globe has a trifle stronger flavor than the yellow and white varieties, and has the same excellent keeping quality as the yellow. Under good cultivation our customers report yields of 1,000 bu. and more per acre. The slim, slender necks insure an early and sure ripening. The tops die down uniformly when the onions are ready to be pulled, and the fully matured and properly cured onion will keep all winter. Takes about 110 days to mature.

750—Pkg., 10c; oz., 18c; ¼ lb., 61c; ½ lb., $1.16; lb., $2.25; 2 lbs., $4.35, postpaid. See Page 47 for Onion Plants.

SOUTHPORT WHITE GLOBE

A most beautiful Onion. A very ball of silver with thin, delicate, pure white skin. The white globe onions do not grow as large nor do they yield as well as their colored brethren, but they average from 2 to 2½ inches in diameter, and the yields on good lands under proper cultivation are from 800 to 900 bus. per acre. The flesh is fine grained, crisp, of a very fine flavor and snowy white in color. Our strain is grown with the greatest care and is so superlative in quality that it has become nationally known. This white onion is in great demand in every market and will always bring the top price. Care, however, should be taken in harvesting and storing these Onions so as to always have them of the finest appearance. As soon as harvested they are best stored away in a cool, dark shed to dry, for if exposed to sunshine, rain or dew they will surely be discolored. Matures in about 120 days.

751—Pkg., 10c; oz., 23c; ¼ lb., 76c; ½ lb., $1.47; lb., $2.85; 2 lbs., $5.50, postpaid. See Page 47 for Onion Plants.

PARIS SILVER SKIN

Silvery white, flattened bulbs. It is one of the best early sorts, very good for pickling and is of mild, pleasant flavor. Also much used for early green bunching onions.

781—Pkg., 10c; oz., 18c; ¼ lb., 61c; ½ lb., $1.16; lb., $2.25; 2 lbs., $4.35; 5 lbs., $10.65, postpaid.

Mixed Onions—See Page 44

SOUTHPORT YELLOW GLOBE

Our selection of Southport Yellow Globe is an especially fine Onion. It is of quite large size, averaging from 3 to 3½ inches in diameter, of beautiful globe shape, with a very attractive light yellow colored skin, and is a heavy yielder. Matures in approximately 110 days. The bulbs ripen down to a solid ball, thus insuring the best keeping qualities. The flesh is a creamy white, fine grained, exceedingly mild, crisp, tender and sweet. Very popular on account of its cooking qualities. Immense yields have been reported by private and market growers. Mr. Earl Nicholas, Mingo, Kans., writes, **"Had 180 square rods in onions this year and they netted me $250.00 clear. You always have real seed and it produces real goods, which, as a result, sell for good prices."**

752—Pkg., 10c; oz., 16c; ¼ lb., 53c; ½ lb., $1.02; lb., $1.95; 2 lbs., $3.75; postpaid. See Page 47 for Onion Plants.

SALZER'S WHITE QUEEN

Our finest pickling onion, also known as White Pearl. It is of exceptional quality and the best of all the white picklers, growing to a size of about 1 inch by ½ inch thick, with a fine neck, and is an exceedingly early strain. Onions remain hard and solid and more than one crop may be gathered for pickling in one season from successive sowings. Although used more for pickling, they are of value for early green bunch onions for early use. They have a mild, sweet flavor. It is not quite as good a keeper as the Paris Silver Skin above, but it is a smaller onion and hence more used for pickling. **787—Pkg., 10c; oz., 25c; ¼ lb., 81c; ½ lb., $1.56; lb., $3.00; 2 lbs., $5.80; 5 lbs., $14.25, postpaid.**

SALZER'S ONION SETS

Planting our Hardy Northern Grown Onion Sets reduces the amount of labor to a minimum, the crop is surer to grow and is ready for use several weeks in advance of that grown from seed. In fact, the ideal way is to use both sets and seeds—the sets to grow spring and summer onions, and the seed to grow onions for late fall and winter use. A pound or two is sufficient for a small family. 10 bushels plant an acre.

In fact, it keeps almost the year around. Remarkably mild and tender, and a prodigious yielder. Order early. **Lb., 35c, postpaid. Not prepaid: 8 lbs., $1.25; 16 lbs., $2.20; bu. (32 lbs.), $3.95.**

Salzer's Extra-Hardy Onion Plants

The use of Salzer's Onion Plants is no longer an experiment. Salzer's Onion Plants are being used more and more widely each year by commercial growers, and we strongly recommend them for the home gardener and for the market gardener. They are inexpensive, they can be set out early and in addition the plants grow well-shaped onions and onions that keep as good as those grown from sets.

You can have extremely early green onions for pulling and you can have fine, large, mature onions about 2 weeks earlier than can be had from sets and very much earlier than from seed. Also, onions from plants seldom run to seed, which is a big advantage to growers. You can set these plants out just as soon as you can get them into the ground—the same as with cabbage plants. This means that you'll get earlier crops of fully developed and larger onions—the very first onions for your own table use or the very earliest onions that bring the top prices at market. Please state on your order about what date we shall send your onion plants.

Parsnip

SALZER'S HOLLOW CROWN

Parsnips prefer very wet soil and will thrive where carrots will not grow. They make splendid stock feed, and horses prefer them to carrots. A freeze is required to sweeten them. For the best results, deep soil is needed, and fresh manure should not be used as it will cause the roots to divide.

Salzer's Hollow Crown is a grand variety, one of the best. It is enormously productive, roots are 10 to 12 inches long and about 3 inches thick at the shoulder. It is rich in saccharine, has smooth white skin, is uniform in shape, is sweet, tender, sugary. Not only of fine table quality, but the heavy yield and high sugar content make it very desirable for stock feeding. Parsnips will improve the richness of your cows' milk and are also relished by horses. Matures in 130 days.

832—Pkg., 10c; oz., 14c; ¼ lb., 29c; ½ lb., 54c; lb., 90c; 2 lbs., $1.70; 5 lbs., $3.95, postpaid.

SALZER'S DELMONICO

This nationally famous strain, introduced by us, does not require such deep soil for its cultivation. It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the flesh is fine-grained, sweet, sugary, tender and most excellent for table use. Very early, maturing in about 115 days. It is a most prolific yielder, **it contains more saccharine, is sweeter and more nutritious than other sorts, and as it is so easily harvested, large acreages are grown for stock feeding.** Thrives on almost any soil. This splendid variety surpasses every other in yield and quality.

833—Pkg., 10c; oz., 13c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25; 2 lbs., $2.40; 5 lbs., $5.80, postpaid.

Rhubarb—SALZER'S MONARCH

Rhubarb is used extensively for making tarts, pies, sauces and preserves. It is very palatable and delicious. No plant is more easily increased and multiplied than rhubarb. Every family should have some Salzer's Monarch Rhubarb in their garden. No other Rhubarb excels Monarch in richness, tenderness, juiciness, earliness, or freedom from stringiness. Rich, attractive crimson color—vastly superior to the old sorts. Stalks grow to large size without loss to its quality. Cliffwood grown seed. **See Index for Roots.**

1053—Pkg., 6c; oz., 10c; ¼ lb., 30c; ½ lb., 55c; lb., 95c, postpaid.

Huge Pods—Best Quality Peas

Salzer's Giant Exhibition Peas

To those who wish huge podded peas, we suggest that they plant Salzer's Giant Exhibition. It is a late maturing kind. Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, although large, are of a fine quality, sweet, sugary flavor and not tough as one would expect. **The pods frequently grow to seven and even eight inches in length,** depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigorousness. **It has numerous first prizes to its credit,** from various fairs; which accounts for its being named Exhibition. The pods are uniform in size, of a rich dark green color, and well packed with large size peas. One of the best main crop varieties.

Pods rather straight, with curve near end. Vines grow vigorously. Ready to use in about 85 days. To those of our customers who want immense size, a most delicious, heavy yielding pea—we recommend Salzer's Giant Exhibition.

SALZER'S ALDERMAN

Also called "Improved Telephone." Foliage and pods dark green. Pods are very uniform in shape and borne in the greatest profusion. One of the finest late or main crop varieties.

The vines are of strong, luxuriant growth, attaining a height of 4 to 5 feet. Matures in about 85 days. Pods measure about 6 inches and more in length and are densely filled with large, wrinkled peas, sweet and tender, of unsurpassable flavor.

CHINESE GIANT

THE FINEST, LARGEST AND HANDSOMEST PEPPER OF ALL

A magnificent variety, the largest and finest Pepper in cultivation. The plant is about two feet high, of strong, vigorous growth, stocky and erect in habit, very productive, and ripens its fruit earlier than the Ruby King. The fruit is well shown in our illustration, is quite square, averages 4 inches in diameter, and is of a bright, glossy scarlet when ripe. The flesh is usually thick and very mild, having none of the pungency of most of the older varieties. The immense size of the fruit and its brilliant color render it very attractive and will cause it to sell readily in the market. Every private garden should have this sort.

We have grown specimens weighing 21¾ ounces at Cliffwood Farms. Matures in 140 days.

922—Pkg., 10c; oz., 53c; 2 oz., 96c; ¼ lb., $1.82; lb., $7.00, postpaid.

Pepper

SALZER'S WORLD-BEATER

Here is the finest large pepper ever introduced! Salzer's World-Beater is a cross between Chinese Giant and Ruby King, fully as early as our Ruby King and therefore highly satisfactory for the North, and just about as large as Chinese Giant, but it is more prolific. From one plant, we have picked as many as 24 marketable, large peppers.

Salzer's World-Beater measures nearly 6 inches long by 4 inches through, broad and blunt at the blossom end. The flesh is the thickest of any and is mild and sweet, color dark green, changing to a brilliant scarlet when ripe. Plants are of vigorous growth and the strong stems hold the peppers well above the ground, and there are usually 15 to 24 fruits to each plant. May be eaten raw without a trace of burning. Ships well, sells well at market, and is ideal for the home garden. This grand pepper always gives satisfaction.

933—Pkg., 15c; oz., 32c; 2 ozs., 58c; ¼ lb., $1.13; ½ lb., $2.17; lb., $4.25, postpaid.

HARRIS' EARLIEST

Plants are 12 to 18 inches high, compact, bushy and extremely productive. Matures in 128 days.

It is used very much in salads to give them a tasty and attractive appearance, and because of its many uses and great popularity, it is grown very widely by canners. It is of the sweetest flavor, and does not contain a trace of fieriness. They are fine for stuffing as well as for salads.

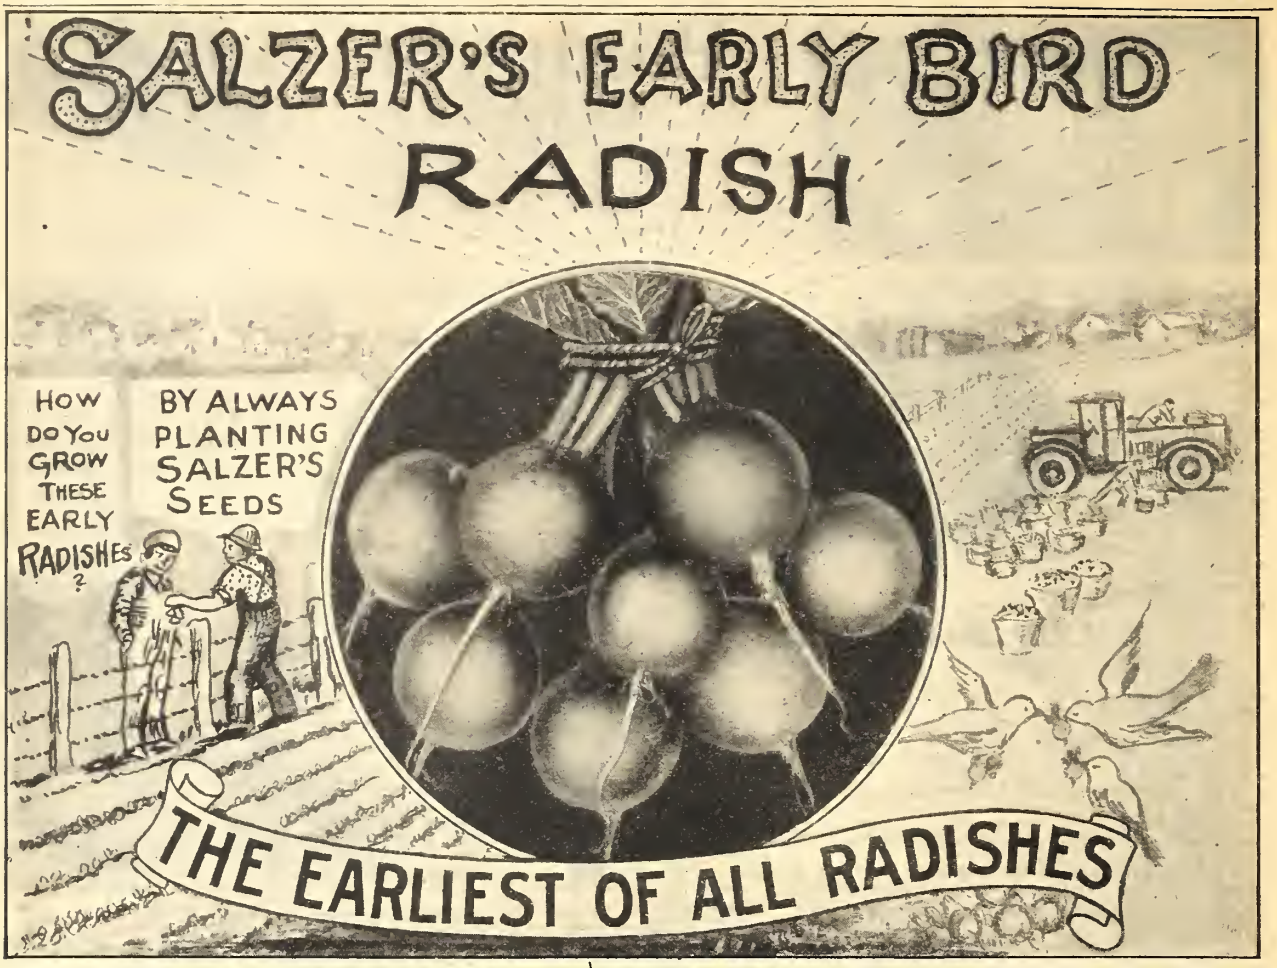
Salzer's Mammoth Pumpkin

Salzer's Mammoth Pumpkins took both First and Second Prizes at our Fair last year.—Elmer Combrink, Billings, Okla.



We introduced this grand variety just 36 years ago and have been extensively developing and improving it ever since, so get your seed from us if you want genuine, true-to-type seed. Don't take anything "just as good." Salzer's Early Bird is of globe-shape, bright scarlet color, has very short tops, flesh is pure white, fine grained, crisp, nice, spicy taste, and never becomes hollow or pithy. Averages ½ to 1 inch in diameter, according to maturity. It is alike most valuable for outdoor planting in spring or in autumn, and always commands top prices.

Salzer's Early Bird, the incomparable radish, produces radishes ready for the table in about 12 days' time, radishes that are uniform in size and shape, even in maturity, with small tops and of beautiful and attractive bright red color. It is also the best strain for growing under glass.

Sow Genuine Early Bird Seed

Mr. Chas. W. Falk, Herrington, Kans., writes, **"I never raised better radishes than Salzer's Early Bird. In 13 days from the day I planted them, we were eating radishes. They were better quality than any other radish."** Mr. Fred Hagerbaumer, 12th and Harrison, R. D. 5, Box 120, Quincy, Ill., writes, **"We always have the best success with your Early Bird Radish."** Rev. A. B. Chamberlin, Dike, Iowa, writes, **"I have found Salzer's Seeds to be very good, and your Early Bird Radish especially fine."** Mrs. Otto Bohlman, Box 852, Kelso, Wash., writes, **"Your Early Bird Radishes matured in just 14 days."**

It is a sure yielder and will not disappoint a single market gardener nor home gardener who sows it, but will be a source of genuine pleasure and profit. We know of none of our vegetables that will pay the market gardener better, and that is more desirable for the kitchen garden, than Salzer's Early Bird Radish.

Now, the substance of the whole matter is this: If you are at all anxious, either as a market gardener or as a grower of Radishes for your own private table, to have Radishes from 6 to 12 days ahead of your neighbor, and if you are anxious to have the finest Radish that seed can produce, even under the most adverse circumstances, then by all means plant Salzer's Early Bird. Its crisp, brittle flavor, as well as its remarkably quick growth and fine color, alike recommend it. In favorable weather the Radishes matured in about 12 days. Not only is Salzer's Early Bird extremely early, but it also yields heavily and its quality is unsurpassed. You will agree that it is the earliest, finest and best tasting radish that is grown to-day.

Rutabaga

Rutabagas are also known as Swedish Turnips, Swedes, or Russian Turnips. They have firmer flesh than turnips, however, are more solid, and hence keep later into spring. Like turnips, they are excellent for stock feeding and as a rotation crop. Stock thrive and increase in value rapidly when turnips and rutabagas are fed in liberal quantities, and next to mangels are one of the cheapest feeds on the farm.

Salzer's Rutabaga and Turnip seeds enjoy an enormous sale on account of the sweet, juicy product of their crops. It will pay you to pay 20c to 50c a pound more for our seed than such as you buy in stores. Our seeds produce big crops of fine, sweet, juicy, rich Rutabagas.

We consider Salzer's Mammoth Russian the heaviest yielding, the largest and most uniform variety, that withstands most cold and that will submit to most heat. It is also the finest and sweetest rutabaga for table use, and is devoid of woodiness. It is the most attractive. It has the most protein. Has very short neck. Easily harvested. Sow about two pounds per acre. Flesh is fine grained, golden yellow, mild-flavored, solid and particularly palatable, making it by far the best of all varieties for the table as well as for stock. Ready for use in about 75 days.

Princess Juliana Spinach

Spinach

THE NEW SPINACH PRINCESS JULIANA

A New Introduction—Extra Large Leaves—Heavily Crumpled—Deliciously Tender.
This wonderful new Spinach was introduced from Holland four years ago as an improvement of the old Long Standing Spinach. We have been carefully testing and improving it ever since and in offering it to our customers, it is with the confidence that it will give the utmost satisfaction everywhere.

Princess Juliana is of remarkably vigorous growth and is free from disease. The rich dark green leaves are of great substance, heavily crumpled, rounded, and grow in a dense compact rosette with a glossy and attractive appearance. Cooks beautifully and has a flavor superior to any other spinach. Succeeds equally well everywhere, and yields prodigiously. Don't pass this by, as we know you will be pleased with it.

1074—Pkg., 10c; oz., 12c; ¼ lb., 22c; ½ lb., 39c; lb., 75c; 2 lbs., $1.35, postpaid.

KING OF DENMARK SPINACH

It is slow to go to seed, and continues to grow and hold its fine quality weeks after other sorts have gone to seed. For a number of years we have been working and developing a strain that would withstand the hot sun, extreme dry spells and not go to seed easily, and in our King of Denmark, we have at last succeeded in combining these qualities in this wonderful strain. Our seed is grown in Denmark, hence extremely hardy, vigorous and productive. A fine strain for canning. Mrs. W. L. Russell, Gen'l Delivery, Du Bois, Pa., writes, **"Grew plants of your King of Denmark Spinach weighing 1½ lbs. They were tender and crisp."**

It forms large, low, compact tufts. The tender leaves are large, broad and rounded. Exceedingly bushy, slightly crumpled and of a glossy dark green color. Ready for use as early as any spinach and retains its condition about two weeks longer. Matures in about 45 days. Yields abundantly.

1065—Pkg., 9c; oz., 11c; ¼ lb., 20c; ½ lb., 35c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.25, postpaid.

SALZER'S SAVOY OR BLOOMSDALE

The earliest spinach, extremely hardy, and a superb shipper. It grows quickly to a suitable size for use and refuses to run to seed, to a remarkable degree. Upright growing plants with thick, glossy, tender dark green leaves, of a good standard size, broad, pointed, twisted, curled and wrinkled. Matures in about 40 days.

1070—Pkg., 7c; oz., 11c; ¼ lb., 20c; ½ lb., 35c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.25, postpaid.

SALZER'S TRIUMPH

This grand strain was introduced by us over 20 years ago. **Withstands hot weather longer than most other sorts,** hence highly desirable for making succession sowings. Does not run to seed easily. The numerous, short stemmed leaves are heavily crumpled, thick warted and are fine and tender when cooked. Succeeds in all sections of the country.

1071—Pkg., 5c; oz., 7c; ¼ lb., 20c; ½ lb., 35c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.25, postpaid.

Salzer's King of Denmark Spinach

WINTER PRICKLY SPINACH

A splendid fall and winter variety, but is also well adapted for spring use. Produces hardy, large plants of vigorous growth with thick and dark green leaves. Heavy yielder.

1073—Pkg., 5c; oz., 7c; ¼ lb., 20c; ½ lb., 35c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.25, postpaid.

SUNFLOWER

SALZER'S JUMBO—Bears large heads, frequently 12 to 20 inches in diameter and sometimes yielding 1,000 pounds of seed per acre. Makes splendid feed for chickens and parrots. **Sunflowers also produce 20 to 30 tons palatable silage per acre and can be successfully grown where spring is late and frosts are early.**

There is absolutely no waste to the crop. Every portion can be utilized. The seed is eagerly eaten by fowls, and they fatten thereon and lay more eggs than on any other food. It is relished by horses, and enables them to stand more work with less fatigue than if not fed therewith. Cattle, sheep, swine, etc., thrive and fatten thereon. The oil burns well, and 20 barrels can be made per acre.

Outside of the feeding and health-giving properties of the Sunflower, comes their great value as fuel; indeed, for treeless districts, nothing can excel it. A correspondent of the Dakota Farmer, says: "Having tried turf, coal, wood and sunflowers, I have settled upon the last named as the cheapest and best fuel for treeless Dakota. I grow one acre of them every year, and have plenty of fuel for one stove the year round. I plant in hills the same as corn (only three seeds to the hill), and cultivate the same as corn. I cut them when the leader, or top flower, is ripe.

4703—Pkg., 5c; ¼ lb., 9c; lb., 30c; 2 lbs., 51c; 5 lbs., $1.06, postpaid. Not prepaid: 10 lbs. or more, at 15c per lb.

I used your seeds this year and they are simply wonderful.—Mrs. Nils Rein, R. D. 2, Madison, Wis.

Salzer's Earliest of All Tomato

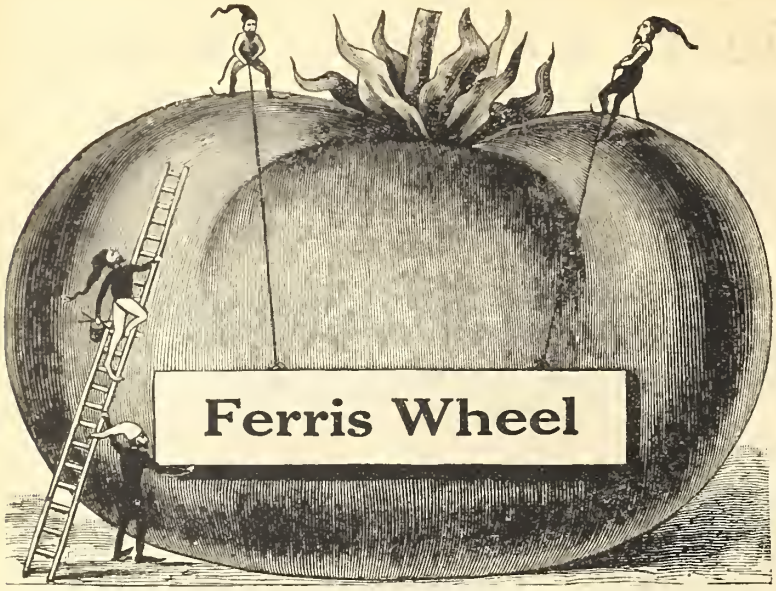
Although introduced by us many years ago, Salzer's Earliest of All is still the leading extra early tomato, the earliest large-sized variety grown, and we believe, as we are constantly improving it, it will hold its position and will stay on top as the **Earliest of All.**

With us in the North it has always been a study to produce extremely early vegetables, such as will ripen and produce perfect fruit in a short time, and in Earliest of All our efforts have been successful. Everybody who has tried it, speaks of it in highest praise. **Earliness in tomatoes is essential for the market grower and highly desirable for the home garden. Salzer's Earliest of All is the best extra-early so far produced; it is our very earliest strain; it is a "short season" tomato.** Ripening as it does in about 108 days, in the North, it is especially well adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety. If you want the very earliest tomatoes, combined with fine flavor, meatiness, productiveness, attractiveness, and tenderness, you should plant our Earliest of All. It is bound to please the most particular.

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The fruits are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and keepers. Mrs. Art Johnson, Clintonville, Wis., writes, **"I have used your Earliest of All Tomato for 3 years. It's the earliest tomato I have ever used."** Mrs. Otto Klaerner, R. D. 2, Box 157, New Braunfels, Texas, writes, **"Both my friends and I find your Earliest of All Tomato is unbeatable."**

1118—Price of Salzer's Earliest of All: Pkg., 15c; oz., 45c; 2 oz., 85c; ¼ lb., $1.60; lb., $6.25, postpaid.

Your Earliest of All Tomato has given us ripe tomatoes in much less than 108 days.—Jefferson S. Bowen, 757 7th Ave., Wauwatosa, Wis.



SALZER'S FERRIS WHEEL

The tomato is recognized by the medical profession as holding five points of merit which makes it actually indispensable in the vegetable garden. These points are that the tomato is the richest of all foods in vitamins; it is the most wonderful and effective blood cleanser of all foods; it is the best of all vegetables for keeping the stomach and intestines in condition; it is an extraordinary tonic for the kidneys, and it is used widely in curing diabetes and Bright's disease. In addition, it is extremely valuable for feeding the juice to infants, accomplishing wonders in cleansing and building up the tiny stomachs. Every garden in the U. S. should contain at least a few tomato plants. Plant some this year!

Salzer's Ferris Wheel is of the large Ponderosa type and averages about 1¾ pounds in weight, although at Cliffwood Farms we have grown specimens weighing over 4 pounds. Fruits have thick, solid, meaty flesh, which is of the finest quality, delicious, sub-acid flavor and very small seed cavity. The vines are strong and vigorous and easily bear their enormous weight of fruits which are of handsome appearance, smooth, and which have a rich dark purplish-crimson skin. Salzer's Ferris Wheel has been continually developed for immense size, uniformity, flavor, productiveness and to resist any tendency to split. Matures in about 142 days. A grand tomato for the home gardener as well as for market gardeners. Mr. H. W. Hannebaum, 2405 Stuart St., Indianapolis, Ind., writes, **"Your Ferris Wheel Tomato is the best and biggest we have ever grown. The crop is sure and quality and flavor are fine."**

1139—Pkg., 15c; oz., 55c; 2 oz., $1.05; ¼ lb., $2.05; ½ lb., $4.05; lb., $8.00, postpaid.

SALZER'S IMPROVED PONDEROSA

Rightly named "Ponderosa" because of the large size it attains. Fruit is very solid, with few seeds. Our seed stock of this strain is the finest obtainable, and while very often large tomatoes, from their very size, are rough and have a tendency to split, we have developed and selected this seed so exhaustively that we have removed the roughness and splitting tendency as far as it is possible to do so. Note the large size and perfect condition of the tomatoes in the accompanying illustration.

Vines are vigorous and bear well. Fruits large, oblong, purplish red, with thin skin. Flesh is solid, with a very small seed cavity, making it a most desirable variety for slicing. **To all who desire large size, solidity and flavor, we unhesitatingly recommend it.** The vines are vigorous and very productive. Requires about 140 days to mature.

Chas. Stone, Bishop, Calif., writes: **"Bought one package of Salzer's Improved Ponderosa last year and took first prize with them at the County Fair."**

1142—Pkg., 10c; oz., 48c; 2 oz., 86c; ¼ lb., $1.60; ½ lb., $3.12; lb., $6.00, postpaid.

YELLOW PONDEROSA

Same fine characteristics as the Ponderosa described above, except that the color is a rich golden yellow. Paul Schur, Vernon, Texas, writes, **"I grew your Yellow Ponderosa Tomato and raised fruits weighing 1½ to 2 pounds and measuring 5 to 6 inches in diameter. Not only I, but my neighbors as well, think they are unbeatable for quality."**

1179—Pkg., 10c; oz., 52c; 2 oz., 94c; ¼ lb., $1.77; lb., $6.75, postpaid.

EARLIANA

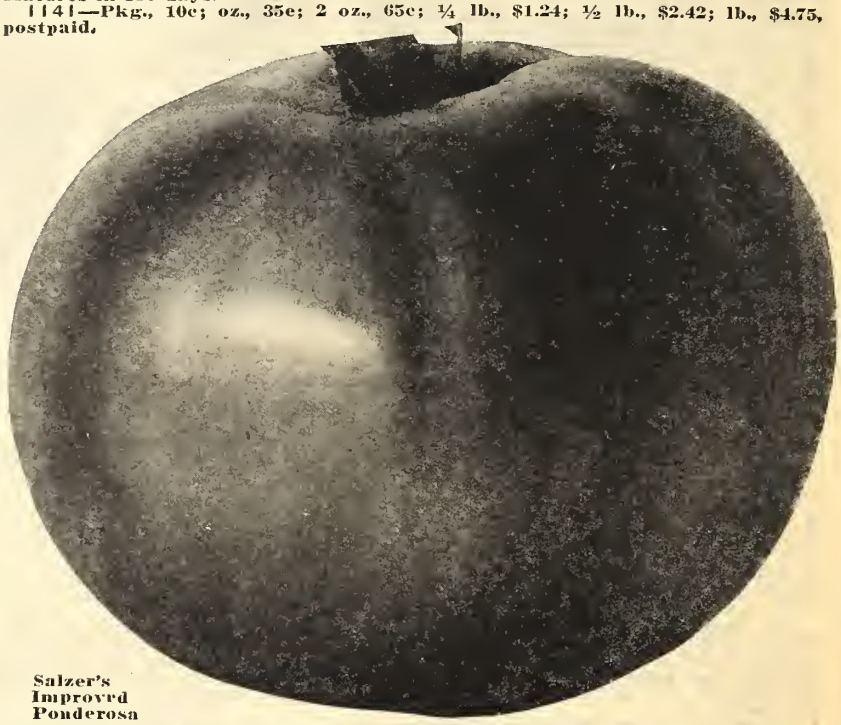
An extra-early deep red tomato, widely grown in all sections of the country. The vines are compact in growth, with short, close jointed branches. It is very productive bearing good sized fruit, uniform in size (about three inches in diameter) which has solid, thick flesh of excellent quality. Splendid for shipping. Matures in about 118 days.

1117—Pkg., 10c; oz., 34c; 2 oz., 60c; ¼ lb., $1.10; ½ lb., $2.10; lb., $4.00, postpaid.

JUNE PINK

A large and decidedly pink-fruited variety, vines of spreading growth. The fruits average about 5 to 6 ounces in weight, are nearly round and slightly ribbed. Flesh is solid, of fine texture and best quality. It is a prolific bearer, clusters of six to eight large fruits being borne close to the main stem. Is also known as the Pink Earliana. **Of great value to the gardener who grows for markets where pink tomatoes only, sell readily.** Matures in 120 days.

1141—Pkg., 10c; oz., 35c; 2 oz., 65c; ¼ lb., $1.24; ½ lb., $2.42; lb., $4.75, postpaid.



Salzer's Improved Ponderosa

I had remarkable success with both your Improved Ponderosa and Yellow Ponderosa Tomatoes. They bore from January until May.—C. J. Davis, 1553 S. W. 7th St., Miami, Fla.

Salzer's 1927 New Wonder Tomato

SALZER'S NEW, SUPERB TOMATO

"Peak of Perfection"

This is the grand, new "Wonder Tomato" which we distributed free in 1927, and in 1928, named "Peak of Perfection!"

Here, Sir, is a tomato, the like of which you never spied before. **If it is size you want, and just a luscious, deliciously good, all around tomato, then you must plant Salzer's Peak Of Perfection!** A tomato that is in a class by itself, a tomato of monstrous size!

We gave free seeds of this tomato to our customers and friends in 1927 under the name of New Wonder and offered prizes for the largest tomato grown and for the best name for this beauty. Mr. Acro Castle, Hueysville, Ky., won the prize of $25.00 cash for the largest tomato with a weight of 4 pounds 7 ounces. **Think of a monster tomato like that!** Miss Adell Day, 241 Thieme Pl., Utica, N. Y., **won** the prize of $10.00 in trade for the best name, Peak Of Perfection, which was selected by the judges after careful consideration.

Customers and friends throughout the entire country planted this fine strain last year again, and everyone had heavy delicious tomatoes, the best ever. Peak Of Perfection is of immense and monstrous size with remarkably solid, meaty flesh. One tomato sliced is more than sufficient for the ordinary family of four or five.

Peak Of Perfection is practically free from seeds, which naturally makes the seed harder to get and a bit more expensive, but it is well worth the slightly higher price. The tomatoes are of a beautiful appearance, uniformly large and smooth, with a rich dark crimson skin, meaty, and have a delicious, melting flavor. **All esteem it the finest flavored tomato they have ever eaten.** But, combined with this delicious flavor, is the enormous size! **Think of one single tomato weighing almost five pounds.** Thousands of people grew fruits weighing 3½ pounds, 3, 2¾, 2½, 2 pounds, etc. Only a few contestants reported weights less than two pounds, and those who did, reported very unfavorable weather conditions.

SALZER'S MARGLOBE

A new wilt-resistant tomato that we introduced in 1927! Marglobe is a cross between the Marvel and Globe tomatoes, developed by the U. S. Department of Agriculture, combining the second earliness of the former with the fine table quality of the latter. **Marglobe is of fine scarlet color, globe shaped, of fine texture, deliciously mild in flavor, and wilt-resistant to a marked degree.** Plants are of vigorous and heavy growth.

For both the home gardener and the truck gardener Salzer's Marglobe "Wilt-Resister" tomato is going to prove a boon—taking a lot of the guesswork out of tomato-raising and putting a lot of tomato-profits into the grower's pockets.

We have a record of one plant, on diseased soil, producing 107 large, fine round, best quality tomatoes. Customers will make no mistake in planting Marglobe where the ordinary varieties have been giving unsatisfactory yields because of wilt.

Everybody likes it.

The fruits are very meaty and have a thick skin, making them good shippers. **Topepo may be eaten raw or sliced, similar to tomatoes, or used in salads, stuffed and baked, boiled, or served with tomatoes and lettuce.** It is already immensely popular all over the country. It is of fairly symmetrical globe shape. One of the heaviest cropping garden turnips and an excellent keeper. It is ideal in size and attractive in appearance. The roots are large, and white with purple color above ground. SALZER'S COWHORN TURNIP

In Cowhorn Turnip you have the best **"plougher," the best deep cultivator** on the farm! It's better than a 12-inch deep plow. Cow Horn tunnels into the soil, often 24 inches deep, and brings up the good qualities and mixes it with the surface. Its long carrot-like shape has made it immensely popular with farmers where more friable land is desired. Its penetrating growing habit loosens up the land and makes a better and richer growing soil for succeeding crops. Aside from this, it has all the other good qualities of a turnip and is splendid for the table. Excellent for stock; superb for plowing under as a green fertilizer. This turnip grows partly above ground. The skin is of a clear white color with a shade of green on the crown. Matures in about 60 days.

You will be impressed and delighted with the large flowers which are 4 to 6 inches in diameter and which are half double, exhibiting the grace and beauty of the single aster, but greatly enhanced by a cushion center of tiny quills of a contrasting color. The golden yellow ground-tone of the quilled center petals, harmonizes beautifully with the pink, blue, lilac and white of the outer petals, which form a charming loosely curled circle. The plant is of branching habit, bearing its lovely flowers on long and strong stems, making it invaluable as a cut flower.

The delicate beauty of this Aster will appeal to every garden lover who wants exquisite flowers for garden decoration or for cutting. We offer the following good range of colors:

SALZER'S NEW CALIFORNIA GIANT ASTERS

Since introducing the Beauty Type of Aster, we have frequently received inquiries for a Crego with the robust habit of growth and length of stem that characterizes the Beauty Type. After several seasons of hybridizing and selection we finally produced such a flower, and in 1927 introduced Salzer's New California Giant Asters, a type characterized by the Beauty's vigorous growth and the Crego or Ostrich Feather type of flower. A true non-lateral type.

The flowers are much larger and more substantial than the Improved Crego. They measure 5 to 6 inches in diameter, and stand up well when shipped as cut flowers. Their immense size and beauty, as well as their long and sturdy stems make them very attractive when arranged in bouquets, and they well deserve their name. The flowers last unusually long when cut. Wherever exhibited, this superb new type has won prizes and received awards of merit.

ASTER CULTURE

Asters delight in a rich, moist soil, and, to produce the largest and finest flowers, they should have plenty of room and be given frequent cultivation. For the earliest flowers, start the seed indoors in March and transplant the seedlings to the open ground when they are about 4 inches high. For later bloom, the seed may be sown in the garden in May after the soil is warm. The plants should be thinned out to stand at least a foot apart.

Salzer's New Dwarf Aster

Salzer's New Bi-Color Aster

NEW BI-COLOR ASTER

A lovely new Aster which we introduced in 1927. The plants are of strong, vigorous growth, producing on long and strong stems, large and perfectly formed double flowers in great profusion. The flowers measure as much as 4 to 5 inches in diameter, the center being a beautiful soft and fluffy cushion of golden yellow, surrounded by outer petals of soft lavender. At Cliffwood Farms, they attracted much favorable comment. The petals are delicately quilled, giving the flower a charming appearance. 1716—Pkt., 12c; ⅛ oz., 55c; ¼ oz., 90c.

SALZER'S DWARF ASTER

The flowers are a beautiful, delicate lavender, overlaid with cerise pink. Very desirable. 1717—Pkt., 12c; ⅛ oz., 55c; ¼ oz., 90c.

ABUTILON (Flowering Maple) TP

Valuable house-plants and suitable for the outdoor garden except in the extreme northern states. If sown early indoors in boxes, or in the hot-bed, they will bloom the first season. The plants should be lifted in the fall and brought indoors, where they will flower throughout the winter. They are not at all difficult to grow.

SALZER'S ANTIRRHINUM OR SNAPDRAGONS HHB

Within the last few years Snapdragons have become immensely popular. This is not to be wondered at, as, whether used for cutting or for show in the garden, they are one of the most valuable flowers which can readily be grown from seed. We offer three distinct types, the large-flowering, tall-growing or giant, the equally large-flowered, half dwarf variety, and the dwarf Snapdragons.

Although they are really biennials, or short-lived perennials, they bloom freely the first season from seed. If cut back and potted up in September, they will bloom nearly all winter, making splendid house decorations. In our trials the seeds sown out of doors the first week of May came into bloom early in July, remaining in full flower until November. For earlier flowering, they may be started indoors or in a frame in March, transplanting them to the open when the weather is suitable. After exhaustive tests of scores of varieties we offer the following as the best in their respective colors.

TALL MAXIMUM, GIANT FLOWERED

Antirrhinum, Half-Dwarf, Black Prince

It is easily grown from seed, and may be started in hotbed, in the house or in the open ground, the seed germinating in about five days. The plants may be expected to come into bloom early in July and continue until quite hard frost. It delights in a sunny situation. As a cut-flower it is especially valuable, the blooms lasting a week or ten days in water, and if undeveloped buds are cut and placed in a sunny window, every one will open and produce as fine flowers as though left on the plant. CINERARIA G

Beautiful flowering plants for the house or conservatory during the spring months.

Seed should be sown from May to September for succession. Where only one sowing is made, July should be preferred. Cinerarias grow so freely that the seedlings may go straight from the seed-pans to pots. After transplanting place in a cold frame facing north, if possible. When the pots become full of roots, shift into larger ones till the flowering size is reached. Our prize strain is justly celebrated for all good qualities, being especially noted for size, coloring and texture.

Salzer's Cosmos HHA

One of our most popular annuals for tall borders and for cutting, producing thousands of artistic flowers in pure white, pink, and crimson shades, furnishing an abundance of bloom for autumn decorations when other flowers are scarce. We recommend sowing about the first of May in the open ground, in rows covering the seed ¼ inch, and when the plants are 3 inches high, thin out or transplant to 18 or 20 inches apart. When the plants are 1 foot high, the tops should be pinched out to induce a bushy growth. May also be started under cover and afterwards transplanted.

Any garden soil will grow Cosmos to perfection; frequent cultivation around the base of the plants will greatly benefit them. The Autumn Giant sorts produce the largest flowers, but bloom late; for extreme northern parts, sow the extra-early flowering type.

Helichrysum or Strawflowers HA

One of the very finest of the well-known "Everlastings." Large, full, double, daisy-like flower heads with prominent centers and stiff overlapping scales, produced in various bright shades on stems of good length. Splendid for cutting. Highly desirable also as dried flowers and for use in making winter bouquets. This is undoubtedly the most popular of the "Everlasting" flowers. The new and improved varieties listed opposite, are showy and attractive when grown in the garden, and they keep well as cut flowers. When dried, their bright and brilliant colorings make beautiful house decorations during winter.

The plants grow readily from seed sown in the open ground when the trees are starting out in leaf, and in order to allow them to obtain the maximum development, thin the plants out to at least one foot apart. Those flowers which you desire for winter decorations should be cut with as long stems as possible when they are about one-third open. The foliage should then be stripped from the stems, the flowers tied in small bunches, and hung (flowers downward) in some dark, dry, cool place until cured.

Strawflowers grow from two to two and one-half feet high and are easily grown, succeeding in any good garden soil. Very effective in beds and borders. Plant a packet this spring and dry some of the flowers for next winter. We offer the following choice colors, extra selected, pedigreed seed:

GIANT FLOWERING HELICHRYSUM

LARKSPUR

(Annual Delphinium) HA

These are among the best-known garden flowers, and in recent years a vast improvement has been effected by careful selection in size and color of the blossoms and the general habit of the plant. Seeds sown in the open ground before the close of April will produce flowering plants by the beginning of July, and give a continuous succession of flowers from then until frost, a record that is not surpassed by any other annual. They make handsome beds or lines, and their free, graceful habit and bright colors are very effective when interspersed in the old-fashioned flower or shrubbery border. They stand well when cut, and a vase of one or mixed colors is indeed charming.

SALZER'S FROST PROOF PANSIES

Pansies HHB

(Heartsease)

Salzer's Frost Proof Pansies are what their name implies; they successfully winter through the severe climate of this north country and will bloom long after frost. For a number of years Frost Proof Pansies at our Cliffwood Farm have delightfully surprised us with the number of beautiful blossoms we pick during the cold months.

The flowers themselves are very large, often measuring 3 inches across, and are produced in a beautiful variance of colors from deepest black to snow white. Mrs. J. W. Webb, R. D. 1, Box 301, Roanoke, Va., writes, **"One packet of seed gave me a lovely bed of Pansies. They were in bloom January 23rd."** Miss Rhoda Cole, Okemah, Okla., writes, **"I picked Pansies December 24th, and they were lovely."**

We are able to give you varieties in straight colors as listed, or straight blended Cliffwood mixture in which all colors, bronze, blue, mahogany, yellow, mauve, black, etc., are represented. Have pansies after all other flowers are killed by frost.

SOW SALZER'S SEEDS

Your Frost Proof Pansies were the most wonderful pansies I have ever grown or seen around this vicinity,—so distinct, so extra large, such glorious coloring. They withstood bad droughts and very heavy frosts.

Mrs. Daniel Davis, R. D. 1, Gales Ferry, Conn.

Your Frost Proof Pansy Seed grew nicely and bloomed wonderfully. In spite of the very hard winter, the plants are all green and just about ready to bloom.

Mrs. Alex Graber, Apple Creek, Ohio.

Culture of Pansies. The seed germinates better, and the plants grow more freely, in cool weather. Good results may be had from sowing the seed in April in a light, cool, but well-moistened soil, enriched with well rotted manure, or fine ground bone. Sow in drills, covering four times the diameter of the seeds, firming well. Seed will germinate in about two weeks and should not be allowed to dry out. A small covering of newspapers will hasten germination. When plants are large enough to handle, thin to 10 inches apart. Do not plant Pansies in the shade of trees or buildings. During dry weather, water daily.

I got about 200 plants from your Frost Proof Pansy seed, and picked 800 blossoms every other day for 6 weeks.—Mrs. F. Benbon, 1102 Walker St., Jackson, Mich.

PETUNIA HA

Few flowers excel Petunias in brilliant and gorgeous display, especially for porch or window boxes. They commence flowering very early, and continue their riotous production of bloom throughout the whole season, until killed by frost. Easily cultivated, requiring only a good soil and a sunny position. It is best to sow them indoors and transplant to the open in May, although the seed may be sown directly out of doors in May. 1 to 1½ feet.

CLIFFWOOD BALCONY SORTS

Seed may be sown in the open ground any time when danger from frost is past, and in a few weeks they are a sheet of bloom, remaining so till frost. All faded trusses of flowers should be removed to get continuous bloom.

SALZER'S NORTHERN GROWN POPPIES HA

Annual Poppies should be sown as early in the spring as possible where they are to remain, as they do not stand transplanting. Sow very thinly, preferably in cloudy weather or after a shower, barely cover the seed, press down firmly and they will come up in a few days. If they come up too thickly, thin out to 3 or 4 inches apart for best results. The flowers will last several days in water, if picked just before expanding. Pick the old flowers as soon as fallen, to lengthen the blooming season.

SALZER'S ORCHID FLOWERING SALPIGLOSSIS HA

SCABIOSA HA

Also known as Pin-Cushion, Mourning Bride and Sweet Scabiosa. These ever-beautiful, hardy annuals grow about 2½ feet high, and bloom from July on, until cut down by frost. They are very easily grown and are highly desirable for cutting as well as for beds and borders. They produce their large, fragrant clusters of blossoms constantly, from midsummer until killing frost, in all kinds of weather and on even the poorest soils. For best and quickest results, the seed should be sown early in the house or the hotbed and transplanted to their flowering quarters in May. ROYAL BOUQUET, BUSH VERBENA

2683—This superb Verbena forms a plant 15 to 18 inches high and not more than 10 inches across, no lateral branches being thrown out, and what gives this strain its special value is the fact that the flowers will compare in size and variety of color with those of the finest strains of Auricula-eyed Verbena. The corymbs of blooms are borne on long stems and group themselves together at the summit of the plant. One great possibility in connection with this valuable introduction is its suitability for growing in pots, a thing which has hitherto been impracticable. A fuller and more extended use can therefore now be made of the magnificent flowers which the Verbena produces in such abundance. From the seed that we offer, not less than 75% of plants true to type may be confidently expected. Pkt., 20c; 2 pkts., 35c; 1/32 oz., 30c; 1/16 oz., 50c; ⅛ oz., 90c.

Salzer's "Royal Bouquet" Bush Verbena

Explanation of Abbreviations Used in the Descriptions

HARDY ANNUALS, HA. These should be sown outside in April or May, according to season, latitude, and condition of soil, or they may be sown at a somewhat earlier date in a hotbed or greenhouse, the combining of the two methods being advisable, thereby providing for a succession of plantings if both sowings prosper. Seed sown under glass will also produce earlier-blooming plants than seed sown outdoors.

HALF-HARDY ANNUALS, HHA, HALF-HARDY BIENNIALS, HHB, and HALF-HARDY PERENNIALS, HHP. These may be sown indoors, as above directed, from March to May, and outdoors after the middle of May. Many of the Biennials and Perennials will bloom the first season if sown early.

HARDY BIENNIALS, HB, and HARDY PERENNIALS, HP, can be sown outdoors as soon as the soil is in good tillable condition. If sown early indoors, many of them will bloom the first season. Sowings made from July to September will produce well-established plants for the next season. These should be somewhat protected during the winter. Many seeds of Hardy Biennials and Hardy Perennials are of very slow germination, and seeds of such should not be condemned as bad if a quick germination does not show.

TENDER ANNUALS, TA, TENDER BIENNIALS, TB, and TENDER PERENNIALS, TP, can be sown in March in the greenhouse or in hotbeds in shallow boxes. Transplant to secure sturdy plants, which can then be planted outdoors after danger of frost is over, about May 15.

HHA, HHB, and **HHP** designate Half-Hardy Annuals, Biennials and Perennials.

HB and **HP** designate Hardy Biennials and Perennials.

TA and **TP** designate Tender Annuals and Perennials.

G designates plants generally grown indoors only in pots.

Any species or variety to which no letters are affixed are to be considered as Hardy Annuals.

Last summer I raised Zinnias from your seed, and I wish you could have seen them. I planted some real late, and am still picking them (November 18). Everyone went wild over them. They are sold weekly to one of the finest hotels for table decorations, and the guests are delighted with them.
Mrs. Frieda Arrechea,
Dufferin & Washington, Riverside, Calif.

SALZER'S CALIFORNIA GIANT ZINNIAS

This fine new type has smaller centers and more loosely placed petals than the old Large Flowering Dwarf Zinnias, thus presenting a pleasing appearance. The size of the flower has been notably increased over the Giant Show type. The petals are decidedly imbricated and the flower from bud to bloom assumes a succession of graceful forms.

The flowers are truly giant in size, frequently measuring 6½ to 7 inches in diameter, and are borne on long and strong stems. When cut the graceful flowers last exceptionally long in water, and make a lovely bouquet. Everyone who has seen them has greatly admired this lovely new mammoth type of Zinnia, and its lovely range of colors. We offer it to our customers with the confidence that it will be a most welcome addition to the flower garden.

LARGE FLOWERING DWARF ZINNIA HA
(YOUTH AND OLD AGE)

Such rapid strides have been made in the development and improvement of this useful class of annual flowers that the modern Zinnias would hardly be recognized by the gardeners of a generation or two ago. The old-fashioned Zinnias were stiff and prim and their colors were dull and raw, but the Zinnias of today are elegant in form and rival even the tulips in brilliancy and variety of color. Certain it is that few of our common flowers produce such a gorgeous display over as long a period with only a minimum of care.

The seed may be started in boxes indoors during March or sown directly in the open ground early in May. Transplanting, if necessary, should be done while the plants are still quite young, preferably when they are only about 2 or 3 inches high. They will grow almost anywhere except in shade, but they do best in a fairly rich, medium heavy soil and appreciate an occasional watering in dry weather. In thinning or transplanting leave the young plants plenty of room in which to develop; the large-flowering varieties should stand at least 1½ feet apart.

Large Flowering Dwarf. The Large Flowering Dwarf Zinnias grow bushy, compact plants about 15 inches high, bearing immense, double flowers.

Each of the undernoted colors: Pkt., 10c; ⅛ oz., 20c; ¼ oz., 35c.

2577—**Orange**	2579—**Rose**	2581—**White**
2578—**Pink**	2580—**Scarlet**	2582—**Yellow**

1589—One packet each of the above 6 separate colors, 50c.
2583—**Mixed, all colors.** Pkt., 10c; ⅛ oz., 20c; ¼ oz., 35c.

2572—**GIANT SHOW** (Grandiflora Robusta Plenissima). Huge flowers measuring often five to six inches across, semi-globular and very double. Grand and long-lasting effects can be produced in beds and borders with this new race. Plants grow about three feet high. Mixed colors. Pkt. 10c; ⅛ oz., 20c; ¼ oz., 35c.

2576—**VICTORY ZINNIAS.** A very distinct variety, with large densely double quilled flowers. Mixed colors only, the colors being mostly in orange, russet, old rose and other autumn tints. Pkt., 15c; ⅛ oz., 50c; ¼ oz., 85c.

2769—**RED RIDING HOOD ZINNIAS.** A very pretty dwarf Zinnia only a foot high and covered all over with little round bright scarlet flowers about an inch across and very double. Very effective for borders. Pkt., 10c; ⅛ oz., 35c; ¼ oz., 60c.

A Bed of Large Flowering Dwarf Zinnias

Salzer's New Dahlia Flowered Zinnia, Crimson Monarch

NEW DAHLIA FLOWERED ZINNIA HA

Besides producing by far the largest flowers of all the Zinnias, the Dahlia-flowered varieties are distinguished by being nearly as deep in the center as they are wide, with smaller individual petals than the ordinary varieties, but many more of them. Moreover, their colors are softer and more pleasing, being characterized by blended shades and pastel effects which, with the slightly reflexed and closely overlapping petals, give the whole flower the appearance of a fine satin cushion. The plants are tall and vigorous, producing a wealth of immense blooms from July until frost.

We are offering the most popular shades separately and predict a record-breaking sale on these easy to grow flowers.

2585—**Exquisite.** Light rose, center deep rose. Most pleasing color in Zinnias.

2586—**Old Rose.** A charming old rose shade. Very popular.

2587—**Golden State.** Deep yellow in the bud, turning to clear rich orange in full bloom.

2588—**Crimson Monarch.** Striking crimson. Enormous flowers, often 8 inches in diameter.

2589—**Dream.** Deep lavender turning to purple. A rare color in Zinnias.

2590—**Polar Bear.** Pure white.

2591—**Buttercup.** A very pleasing shade of rich golden yellow.

Any of above: Per Pkt., 15c; 2 pkts., 25c; ⅛ oz., 70c; ¼ oz., $1.20. One pkt. each of above 7 colors for 80c; ⅛ oz. each for $4.45.

2584—**Mixed.** All of above and other colors, mixed. Pkt., 10c; ⅛ oz., 50c.

Your Dahlia Flowered Zinnias last year were the best I saw and your other seed could not be beat.—H. A. Stevens, Green End Ave., Newport, R. I.

PLANT AND BULB DEPARTMENT

Salzer's Plants and Bulbs have a national reputation. They are the hardiest of any obtainable. They shoot up quickly and bloom early and freely, bearing flowers for a much longer time than less robust stock.

ORDER EARLY

We urge our friends to place their orders as early as possible. Last year we quickly sold out of different varieties, and although we have larger stocks on hand this spring, there is less likelihood of our having run out of some kinds, and your being disappointed, if your order is received early in the season.

TIME OF SHIPMENT

All plants are shipped when stock is ready and when the weather permits planting. For the south, orders are naturally filled much earlier than for the northern states. As orders are received, we book them and ship at planting time unless you instruct us otherwise.

HOW WE SHIP

To reduce weight and volume, plants are shipped without pots and with most of the dirt removed. However, if you wish us to ship house and bedding plants **with soil attached to the roots,** add 10c extra for each plant so ordered. Many of our customers want to receive their plants in the original ball of earth, and this extra charge of 10c covers the additional labor and expense.

PRICES

All prices under this department are for delivery by mail, postage prepaid, unless otherwise specified. Express shipments are not prepaid.

SALZER'S NORTHERN GROWN CANNAS

Cannas do well in all sections of the country and their noble proportioned foliage is extremely attractive, with rich shades of chocolate, red, green, and bronze. Cannas should not be planted less than twenty inches apart each way. Dig up bulbs in fall and plant again in spring. At the beginning of the season we send dormant bulbs; as the season advances, depending also upon the weather, we send out started plants, which will give one earlier flowers. The most effective arrangement is a massed planting in one color, but they may also be planted to produce many striking effects.

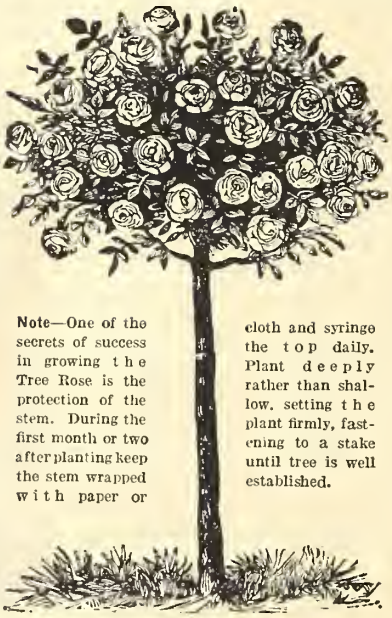
SALZER'S WONDERFUL TREE ROSES



Salzer's Wonderful Tree Rose

Note—One of the secrets of success in growing the Tree Rose is the protection of the stem. During the first month or two after planting keep the stem wrapped with paper or cloth and syringe the top daily. Plant deeply rather than shallow, setting the plant firmly, fastening to a stake until tree is well established.

This beautiful and highly decorative form of roses is seldom offered to the general public. We are extremely fortunate in having a limited quantity this year, but as this type is very scarce, we suggest that you order early.

As shown in the illustration, the plant throws up a single stout stem (like the Tree Hydrangea), at the top of which many lateral branches are thrown out, bearing in profusion a large quantity of large, perfect roses. As a lawn ornament, Tree Roses cannot be surpassed, remaining highly ornamental even when through flowering. LOS ANGELES

THE CUT AND COME AGAIN GLAD!

Here is a fine new pink variety of Gladioli that we know will appeal to everyone. It produces large and perfectly formed, beautiful shrimp-pink flowers with a glowing orange-carmine blotch in the throat, on tall and graceful spikes.

The most remarkable feature of this new Gladiolus is its ability to withstand cutting over a long period, and to constantly throw forth new blooms. Its lateral branches are produced so freely, that several cuttings may be made from one spike, and it has come to be known as the "Cut and Come Again Glad." This novelty is of such real merit, that it will appeal to all who want something a little bit different in their gardens. Grows 3½ to 4½ feet tall and has thrown twenty and more spikes of flowers to one bulb.

First Size Bulbs: Each, 24c; 3 for 67c; 6 for $1.29; dozen, $2.45; 25 for $4.65; 50 for $8.95, postpaid.

Smaller Size Blooming Bulbs: Each, 19c; 3 for 54c; 6 for $1.00; dozen, $1.90; 25 for $3.55; 50 for $6.25, postpaid.

Button Bush

DESMODIUM PENDULIFLORUM. Not strictly a shrub,—rather a half-shrub as the long canes usually winter-kill. The stools, however, become stronger, throwing up more shoots each year, and quickly forming a thick shrub, 5 feet high, very showy in its September bloom. Long, close, drooping racemes of lovely rosy-purple flowers. **Each, 69c; 2 for $1.35; 6 for $3.90.**

CLETHRA ALNIFOLIA (Sweet Pepper Bush). Long spikes of pure white flowers in Aug. and Sept. 5 feet. Unusually fragrant, and may be planted beneath the windows, to scent the house. RUSSIAN OLIVE (Elaeagnus Angustifolia). While this plant will grow 20 feet tall yet when it is kept pruned rather severely, it is a most attractive and contrasty shrub. Its foliage is of a remarkable silvery hue, and in Autumn is simply beautiful. Admirable for tall backgrounds where unusual color tones are desired, for tall hedges, or for low hedges, by keeping it sheared similar to the Amoor Privet. Oval yellow fruit. **Each 27c; 3 for 77c; 6 for $1.45; doz., $2.75; 25 for $5.25.**

SALZER'S NEW RED LEAVED BARBERRY. This new Berberis Thunbergi is the same as that listed above, except that the foliage at all times is a rich, lustrous, bronzy red. Throughout the summer this color is intensified until in the fall its foliage changes to vivid orange, scarlet, and red shades, and is followed by brilliant scarlet berries which persist until far into winter. To develop its brilliant coloring, it should be planted in full exposure to the sun. Owing to the heavy demand for this new shrub, we suggest early ordering. VEGETABLE ROOTS

RUST-PROOF WASHINGTON ASPARAGUS ROOTS

Get your asparagus roots direct from Salzer's celebrated Cliffwood Farms this year! This new variety is so rapidly replacing all other strains, that we have discontinued growing any but the Rust-Proof Washington Asparagus Roots. **The Washington type has been bred to resist rust. It has thick and heavy shoots, long and straight, and closely folded tips. It is a beautiful rich dark green color, darker green at the tips, and is a very heavy yielder.** You will be delighted with both the quality and appearance of this fine variety. Growing rapidly, it is the most tender of all! Plant these extra large roots and save from 1½ to 2 years' time in having your bed ready for cutting. Set roots 4 inches deep and 18 inches apart in rows about 4 feet wide, fertilizing well with stable manure or other fertilizer. The richer the soil, the better the crop. Plant 100 roots to 15 by 20 foot bed. Two-year-old roots can be cut the following year.

It is not only tasty and delicious, but it is very healthy, and every garden should have a small corner devoted to rhubarb. NORTHERN GROWN STRAWBERRIES

All of the varieties listed below have **"Perfect Flowers"** and are not termed "Pistillate." We consider these varieties to be the most dependable and the most profitable to plant. We have tested and tried them out carefully at Cliffwood Farms, and you too will find them the best that can be planted.

Good cultivation is necessary for the best results, a liberal mulching during the summer is beneficial and the plants should never suffer for lack of water. **When plants are received dip them in water at once and bury the roots in moist, shady ground until ready to set out.**

(1) DR. BURRILL (Early). An exceptionally fine early strain, a marvel of vigor, productiveness, quality, color, and size, seldom found in any one variety. The berries are large, delicious and beautifully formed, of a dark glossy red color, with rich green calyx and yellow seeds, making a combination that gives them an unusually attractive appearance. Fruit is very solid and meaty. The plants have a rich, dark green foliage and a very strong root system, so that it is not easily affected by drought or by leaf diseases. Very productive, blooms over a large season, and a splendid canner and shipper. We strongly recommend it.

(2) SENATOR DUNLAP (Second Early). An old and dependable variety and very well adapted to varied soils and climates. This strawberry is of the Warfield type, fruit is good size, regular form, rich, beautiful bright red color and glossy. Flesh is meaty, firm, is a splendid keeper and shipper, and of excellent quality and fine for canning. Ripens next to Dr. Burrill. A wonderful variety for those who haven't time to give it special care because it will produce a good crop under positive neglect.

(3) GIBSON (Medium Late). It commences to ripen with the second earliest and continues for a long season, making a heavy yield of fruit. The fruit stems are large and strong, and the dark green foliage is ample protection for the blossoms and fruit. It is a very strong variety with perfect blossoms and makes an excellent sort for pollenizing non-perfect varieties. The berry is large and regular in shape, holding its size well to end of season. Its color is a rich dark red clear through. Its flavor is fine, just right for home use. Withstands considerable frost.

(4) AROMA (Late). This variety has long been a favorite all over the United States; in fact it has long been considered the standard late variety. It is highly desirable for both home and for market, as its distinctive, delicious flavor is something one cannot forget. Aroma does best on the heavier soils. Berries are large, nearly round, solid, firm, and of an exquisite flavor. Yields heavily.

PRICES of above, postpaid (no less than 25 sold of any one variety): Per 25, 39c; per 50, 59c; 75 for 83c; per 100 (25 of each if wanted), 98c; per 500, $4.00; per 1,000 (any number of varieties), $7.95. Full cultural directions sent free upon request.

PROGRESSIVE EVERBEARING

They produce a never ending yield of medium large berries, sweet, mild, and beautifully colored, throughout the entire summer and fall, until snow flies. To obtain the largest size and the best quality of berries in the fall, keep the flowers picked off until about August 1st. The plants are extremely vigorous and hardy. A splendid type for those who have never planted strawberries before. This variety is furnishing the bulk of the fall supply for the market and we strongly recommend it. Plants set out in spring will bear the following fall, and produce heavily thereafter.

PRICE, postpaid: 25 for 64c; 50 for $1.18; 100 for $2.10; 200 for $4.00; 300 for $5.85; 500 for $8.29; 1,000 for $15.95. Full cultural directions sent free upon request.

SALZER'S MASTODON The New Big Everbearer

This astonishing new everbearing strawberry marks a new era in the growing of berries, whether for market or home. It is a great advance over all other strawberries; the berries are the largest of any variety known, they are very firm and uniform and of a pronounced rich attractive, red color. **They are of a delicious melting quality, very sweet and highly flavored. Everyone pronounces them the best they have ever eaten.** Mastodon starts to ripen its large, wonderful berries within 92 days after the plants are set out and continues until freezing weather. **Then, the next spring Mastodon bears as heavily as any spring variety, and after a six weeks' rest, starts in again and bears all summer and fall.** Yields of 500 quarts per acre every five days for over a month have been recorded,—at 25c per quart, $100 every five days! **Frequently, 19 berries fill a quart,—one berry measured 4⅞ inches around,—and they are just as big in late October (and later) as in July or September.** They never run small. Set some out this spring and have berries the envy of your community, berries that bring you top prices!

Sown with Salzer's Grass Seed

SALZER'S RADIUM LAWN GRASS

It is the easiest thing in the world to grow a beautiful lawn. How often in our own city, as well as in other towns, do we find people spending from $25.00 to $50.00 sodding a lot, when 50c to $1.00 worth of Lawn Grass Seed would do the work, would do it better and give a thicker swath and a greater growth than any sod you can find and put on anywhere. **There is nothing that gives quicker growth and a thicker sod than Salzer's Radium Lawn Grass Mixture. It produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, elastic turf, and is often ready for mowing four weeks from sowing.** This Lawn Grass is composed of a combination of various native and foreign, fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained from spring to winter, year after year, and without burning brown in summer.

Mr. Cyril Marsh, 87 State Road, Ashtabula, Ohio, writes, **"We think there is no better grass seed than your Radium Lawn Grass No. 4526. Our soil here is very sandy (close to Lake Erie) but we have a beautiful lawn from your seed. We are delighted with all your seeds and plants, finding them very reliable."**

For a successful lawn, your soil should be rich, and carefully pulverized, smoothed and leveled. If your soil requires it, fertilize it with well rotted manure, or other fertilizer. Then plant vigorous, dependable lawn grass seed early enough to allow the grass to become well established before being subjected to hot weather, or to the direct rays of the hot summer sun. In spring, sow as early as possible and before a rain, and in fall, sow before the autumn rains. Sow about 1 pound to 200 square feet; about 12 lbs. to 50x50-foot plot. For renewing old lawns, about one-half as much. One pound is about 1½ quarts. Leaflet, "How To Make a Lawn," sent free upon request.

4526—RADIUM: ½ lb., 31c; lb., 58c; 5 lbs., $2.55, postpaid. Not prepaid: 10 lbs., or more, at 45c per lb.

SHADY PLACE GRASS SEED

We have carefully prepared this combination of grasses for sowing in shady parts of your lawn, or under large trees, etc., where the ordinary grasses will not give the best results. It will practically overcome any difficulties you may have had with shaded spots.

4527—½ lb., 34c; lb., 65c; 5 lbs., $2.89, postpaid. Not prepaid: 10 lbs., or more, at 52c per lb.

WIZARD SHEEP MANURE

A splendid fertilizer for lawns. Wizard Sheep Manure is dry, pulverized and screened and all undigested weed seeds have been destroyed so they cannot under any circumstances germinate and fill your lawn with weeds. It is a natural plant food that produces thick, velvety, green lawns. Also good for the vegetable garden, greatly enriching the soil. Apply early in spring, and every month thereafter.

DWARF WHITE DUTCH CLOVER FOR LAWNS

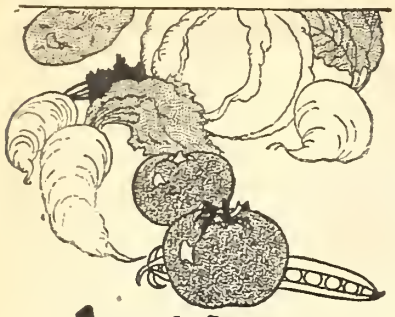
While we do not put White Clover in our Lawn Grass Seed, we have many requests for it and recommend one ounce to each pound of lawn seed. Our Special Lawn Mixture always contains the right percentage of White Dutch Clover. **4249—Radium, per oz., 9c; ¼ lb., 19c; lb., 58c; 2 lbs., $1.10; 5 lbs., $2.55, postpaid. Not prepaid: 10 lbs., $4.50. See current price list for larger quantities.**

SALZER'S SPECIAL LAWN GRASS

If for any reason you have been unable to get a good lawn, you should be able to obtain one by letting us give it our individual attention and making a special mixture to suit your needs. While for almost all general purposes, our grasses are unusually successful, yet extreme conditions require special care. Write us whether you have a new or old lawn, whether it is shady or sunny, level or sloping, heavy or light rainfalls, mild or severe winters, whether fertilized, etc., and kind of soil. Send us a sample of your soil, if you wish. We can then send you a mixture which should give you fine results and enable you to get a good lawn.

4529—½ lb., 32c; lb., 61c; 5 lbs., $2.70, postpaid. Not prepaid: 10 lbs., or more, at 48c per lb.

Last year I received several prizes at the County Fair, by using your seeds.—Mrs. Fred Sarbach, Sr., Box 1, Montpelier, Idaho.



~better vegetables

"After applying Vigoro," writes Ad Hennig, of Neenah, Wisconsin. "I had tomatoes three weeks earlier than the year before. They were of a better quality, more delicious, and uniform in size.

"The same success was evident with the rest of my vegetables."

Vigoro is the ideal plant food for lawns, flowers, gardens, shrubbery and trees. It is easy to apply; results are quick and certain.

Clean, dustless, weedless, and *Odorless!* Vigoro is not to be compared with any other plant food you have ever known. It isn't at all costly.

VIGORO

Specially prepared plant food

For the Lawn, Vigoro is the finest fertilizer and plant food obtainable. In making a new lawn, after the ground has been thoroughly prepared, apply 4 pounds of Vigoro per 100 square feet, mixing it thoroughly with the top soil. It is well, then, to wait one day before sowing the seed. After seed is sown, wet down thoroughly but carefully, so seed is not washed away.

On an established lawn, apply Vigoro early in spring, at the rate of 4 pounds per 100 square feet. Spread it evenly and then wet down thoroughly. Light applications of 2 pounds per 100 square feet, every six weeks thereafter, on both new and old lawns, will keep them beautiful and green through the season. Apply Vigoro evenly,—too much in one spot or heavy applications are wasteful and may burn the lawn.

A FEW DON'TS

Don't apply Vigoro on wet grass, plants or flowers. Wait until they are dry.

Don't allow Vigoro to come in direct contact with seed, foliage, or roots of plants.

Don't fail to water thoroughly after Vigoro is applied. This will prevent burning of grass, vegetable plants, and flowers.

Price of Vigoro: Lb., 25c; 2 lbs., 40c; 5 lbs., 80c, postpaid. Not prepaid: 10 lbs., 85c; 25 lbs., $1.75; 50 lbs., $3.00; 100 lbs., $5.00.

LOCKED PLANT BANDS

The simplest way to handle plants for transplanting is to grow them in our Ready-To-Use Plant Bands. They come already folded, and all you have to do is to open them, fill with soil and then plant. These bands are economical, they make an ideal worm guard; in transplanting into the field simply put the band and all into the ground, thus preventing exposing the roots to the air, which always sets the plant back. By using these it is even possible to transplant sweet corn, cucumbers, squash, melons, beans, etc. We do not put bottoms in them, so that in the field the roots will not be hindered in any way.

WATCH-EM-GROW PLANT FOOD

A LITTLE GOES A LONG WAY

All Commercial Fertilizers must contain among other things, these three basic chemicals in some form or another, Ammonia, Phosphoric Acid and Potash. But the secret of good fertilizer is the proportion of each. SALZER'S BABY CHICKS SHIPPED C. O. D.

100 Per Cent Live Delivery Guaranteed

We mean just that! 100 per cent live, and full delivery guaranteed,—or we will promptly and cheerfully refund your money. As far as we know, we are the only seedsmen that are selling chicks on this basis. There's a reason. Salzer's Baby Chicks are bred from such high class, pedigreed stock, are so sturdy, strong and healthy (although only a day old), that we know for a certainty they will reach you in A No. 1 shape.

SALZER'S SUPER BABY CHICKS

Every single chick hatched, comes from parent stock that has had the care, culling, mating and grading necessary to make a Bred-to-Lay and Bred-to-Pay strain of poultry. Hundreds of our customers write us that they secure fine show birds from these Super Chicks and carry off first prizes. **Whether you purchase entire flocks or only enough to build up the blood lines in your utility or superior flocks, it will pay you and pay you well to use Salzer's Super Chicks.**

We have a large force of skilled employees who rogue and cull our flocks, of pedigreed parent stock, so that you get only the best and healthiest baby chicks. This means a heavy expense to us, but it saves you many dollars in the end. Don't—buy cheap chicks at cheap stores. **Salzer's Super Chicks are the healthiest, strongest, most highly bred and developed chicks obtainable, regardless of price, and are the best investment in poultry that you can make.**

EXTRA-FANCY CHICKS

When you order baby chicks from us, you are not going to get chicks that were hatched from eggs bought at any source from which eggs happened to be obtainable at the lowest price. **Our Extra-Fancy Chicks are all from parent stock that has been carefully culled, rogued and mated. They have been bred for high egg production and not infrequently, show birds are found among them.** They are strong, healthy, hardy, free from disease and just the thing for the good all around poultry flock.

FULL-OF-PEP

A splendid first class grade of chicks, better than those obtainable from most sources, at a real bargain price.

HOW TO ORDER

We will ship your order C. O. D., if you wish. This permits you to order your chicks far in advance, and then to simply pay the Postman when he brings them. Or, you may send money-order or check with your order. Be sure to state when you want the chicks. We will notify you just about when they will arrive, and if they aren't delivered on that date, phone the Postmaster as the carrier may have missed them and they would then lay in the Post Office over night. Full instructions sent on how to care for them on arrival. Please give first and second choice, to save delay.

NO MORE HATCHING WORRIES

When you order Baby Chicks from us, you are relieved of all your hatching worries. Your chicks come just when you want them. **You know just how many chicks you will get.** You can order them at once (we urge you to order early) and we will then book them and ship at any date you specify. They are all one size and one age. You can have delivered to your home 50 or 5,000. 100% live delivery guaranteed.

SOW SALZER'S SEEDS

I ordered 13 English White Leghorns, 12 Buff Orpingtons, and 25 Black Minorca Super Baby Chicks. Didn't lose a single chick from sickness, and the postman said they were the liveliest chicks he had ever delivered. They arrived April 18 and commenced laying Nov. 23. Up to April 11 they laid 1526 eggs. Four Minorcas laid from 21 to 24 eggs a month. I am trapnesting them all and know just what they are doing. I don't believe I could have gotten better chicks had I paid five times the price.—Earl R. Brogg, 427 E. 2nd St., Monroe, Mich.

See Also Page 79

Beautiful in the extreme, elegant for cutting, large and perfectly formed flowers blooming profusely and over a long period, this fine strain of Carnations is easily grown. Sow seed early in spring, in any good garden soil, for summer flowering; next fall, if you wish, pot a few of the plants for indoor blooming.
